The updated plan was prepared by members of the Neighborhood Conservation Committee of the Arlington Heights Civic Association:

Richard Bullington McGuire, Contributor, Graphic Design, Tech Support
Anthony Halloin, Contributor
Juliet Hiznay, Coordinator and Editor
Sean McNamara, Contributor
Lynn Michaels, Contributor
Kenneth Poole, Contributor

The AHCA Neighborhood Conservation Committee would like to thank our many volunteers, and their loved ones, for the sacrifices that have made this plan update possible. Thanks also to all Arlington Heights residents who submitted comments. Special thanks to Jim and Joan Gill, who prepared and carried out the neighborhood survey, to Catherine Camp for her work on the history section, and to Jill Lewis of the Columbia Heights neighborhood for her photograph donation. The Committee would also like to recognize the able assistance of Arlington County staffers Tim McIntosh, Chris Nixon, Lisa Grandle, and Jennifer Fioretti and all other staff who helped collect the neighborhood infrastructure data included in this plan. In particular the Committee thanks Tim McIntosh for his tremendous efforts in coordinating staff responses to the updated plan.

Executive Summary

Arlington Heights is a quiet residential neighborhood of mostly single-family homes and duplexes. The neighborhood is bounded by two highways and arterials, and is the host neighborhood for a number of county and school facilities. The Thomas Jefferson Middle School and Community Center, Patrick Henry Elementary School, the Career Center, and the Fenwick Center are all located within the neighborhood. Additionally, Arlington Heights is the host neighborhood for the Arlington County Fair. Like all of Arlington County, increases in population and demand for services has placed pressures on the neighborhood, and many of the needs identified in this updated plan are designed to address these issues.

Neighborhood Goals

- Maintain, enhance and promote the single-family residential character of Arlington Heights
- Improve pedestrian safety, promote walking and bicycling, and reduce motor vehicle speeds, and accidents through a combination of improvements to street design, maintenance, signage, traffic enforcement, and traffic calming (where necessary).
- Reduce cut-through traffic.

- Ensure adequate parking in anticipation of increased demand with redevelopment of public facilities and the revitalization of Columbia Pike.
- Improve the quality of commercial buildings and commercial establishments along Columbia Pike to blend with the residential community and provide an attractive commercial area.
- Enhance the accessibility and use of local parks by residents through improved parks and increased green space.
- Preserve and enhance the environment through creation of green space and education of neighbors (e.g., on conservation of resources, including recycling, no littering, no dumping in storm drains, planting of trees and plants, non-use and eradication of invasive plant species from neighborhood yards and gardens).
- Enhance the appearance of Arlington Heights by undergrounding utilities, which will also reduce power outages and damage to trees.
- Enhance public transportation while reducing noise and pollution.
- Work to enhance local public schools, and improve the prestige of those schools.
- Upgrade and maintain existing county and school facilities in the neighborhood.
- Ensure police protection and emergency services that will reduce crime and improve emergency response time.
- Improve storm drainage.
- Increase enforcement of county ordinances.
- Increase participation in the Arlington Heights Civic Association.

Plan Development

Arlington Heights completed its first neighborhood conservation plan in 1980. The survey for this update was completed in 2000, with a response rate of approximately 11%. The original committee of the Arlington Heights Civic Association (AHCA) working on the update dissolved in 2003, and a new committee was formed in 2006, with the intent of completing the update. The neighborhood approved the plan at an open meeting of the AHCA in March of 2007, with minor revisions. The Neighborhood Conservation Advisory Committee recommended the plan without amendment in September of 2007.

Survey Results

The survey responses revealed most of the major issues addressed in this updated plan. Those responding identified neighborhood advantages as quiet and residential, mature trees, good neighbors, convenient location, diversity, transportation, proximity to restaurants and stores, schools, TJ, and the farmer's market. Among the major concerns are pedestrian safety (including ADA accessibility issues), noise, traffic, light pollution from TJ, need for upgrading parks and open space, and the impact of large events at TJ, such as parking, traffic, noise, and litter.

Land Use and Zoning

Arlington Heights is zoned mostly R-6, with large areas zoned S-3A, and some RA8-18, as well as CO and C2 along Glebe Road and Columbia Pike. The neighborhood supports preservation of the mostly single-family character of the neighborhood, and strongly opposes any changes to the zoning or General Land Use Plan other than what is currently permitted under the Form Based Code. County and school government should work closely to ensure that any changes to uses of public land are fully reviewed by the neighborhood, and that these will preserve the character of the neighborhood.

Affordable Housing and Diversity

Like all areas of the county, Arlington Heights has seen tremendous increases in real estate tax assessments in the past 7 years, with many single-family homes tripling in value. Lower cost housing is available in the apartments at the Dominion Arms and in the duplexes in the neighborhood. The 2000 US Census showed an increasingly diverse neighborhood.

Commercial Areas

There are a number of restaurants and shops in the neighborhood, located on Glebe Rd., Columbia Pike, and Walter Reed Dr., as well as some non-profit organizations. Among these are two well-known enterprises: the Arlington Cinema-N-Drafthouse and Bankok 54. The neighborhood is eager to see streetscape improvements along Columbia Pike, as well as improved parking and access to shops along the Pike. The neighborhood supports revitalization of the Pike, but supports existing businesses as well.

Capital Improvements to Infrastructure

AHCA recommends a number of capital improvements to improve the walkability of the neighborhood, as well as the safety of pedestrians. Some critical improvements are needed around the TJ complex, as well as the entryways into the neighborhood closest to Arlington Blvd. Among the major recommended infrastructure improvements are:

- Completion of neighborhood network of sidewalk, curb and gutter;
- Installation of pedestrian friendly lights where they are lacking,
- Improvement of drainage generally, but particularly near Arlington Blvd. and around the Patrick Henry complex;
- Improvement of curb cuts to ensure ADA accessibility;
- Improvement of accessibility to county and school facilities;
- Improvement of safety along Arlington Blvd., and in particular:
 - Assess and redesign entryways to neighborhood along Arlington Blvd.;
 - Improve access to bus stops along Arlington Blvd.;
 - Replace Glebe Rd. bridge (improve pedestrian safety); and
 - Rehabilitate pedestrian bridge connecting Arlington Heights to Ashton Heights;
- Improvement of street signage and markings by installing pedestrian walking signs, children playing signs, and installing textured crosswalks or zebra stripes near public facilities.

Capital Improvements to Parks

There are four park areas within the Arlington Heights neighborhood. These are: the Thomas Jefferson Community Center, Patrick Henry Elementary School playground (unavailable during school hours), Arlington Heights Park (mini park), and Fourth of July Park (proposed name for mini park). A number of improvements at these parks are recommended. Although the largest and most significant space is at the TJ complex, there are opportunities to make improvements at the other locations as well.

Recommended Improvements at TJ:

- More and better playground equipment for tots and older kids;
- Outdoor play equipment geared toward Middle School aged children;
- Outdoor bathroom facilities, accessible when the Community Center is closed, which is often;
- Improved benches;
- Dark skies field lighting;

- More pedestrian lighting;
- Upgrade existing athletic fields;
- Find a permanent solution to parking troubles, designed to meet increased use that can be expected with projected population increases, improved athletic fields, increased demand for recreation facilities, and special events at Thomas Jefferson, such as the Arlington County Fair.
- Improve drainage;
- Balance active and passive uses.

Recommended Improvements at Arlington Heights Park

- Address drainage issues;
- Enhance landscaping.

Recommended Improvements at Fourth of July Park

- Enhance landscaping;
- Upgrade fencing;
- Approve park name;
- Install sign;
- Install drinking fountain (park is located along multi-use path).

Renovation and Redevelopment of Joint Use Facilities

Arlington Heights is home to an unusual number of county and school facilities relative to the size of the neighborhood. Two large school and county joint-use campuses are located in Arlington Heights. The joint-use aspect of these facilities is significant. It creates greater demands upon the facility. Further, since the County Board and School Board are separately elected, they have separate budgets and necessarily have different programming priorities. This has not always been positive for Arlington Heights.

Thomas Jefferson Middle School and the Career Center are both slated for renovation, with work being done by Arlington Public Schools through Building Level Planning Committees. The plan recommends that APS and the County work closely together on these projects, located at joint use facilities, and ensure that the neighborhood is able to fully participate in the decision making process.

Traffic Management and Traffic Calming

There is no question that public safety is a very significant concern of the neighborhood. Eighty percent of residents surveyed were extremely concerned or seriously concerned about speeding vehicles. Eighty percent of residents also believed there were areas of the neighborhood dangerous to school children and pedestrians. Thus, the neighborhood's primary goal for traffic management is to improve our pedestrian network, slow down cars, and reduce motor vehicle accidents. Some of the accidents in the neighborhood are high speed and have occurred at the boundaries of the neighborhood along Columbia Pike and Arlington Blvd. AHCA is aware of at least one fatality of a resident, which occurred at the intersection of Arlington Blvd. and S. Irving St., an intersection that serves as an entry point to the TJ grounds. While speed and pedestrian safety are major issues, only portions of 3 streets in the neighborhood currently qualify for traffic calming. This is partly because many of the traffic issues are on highways or arterials, such as Walter Reed Dr., S. Glebe Rd., and Second St. S. Other techniques for slowing down traffic will need to be employed, such as improved law enforcement, improved nubs, textured sidewalks, zebra stripes, and appropriately-sized pedestrian walkways (especially around public facilities). The plan also recommends a traffic engineering assessment of the entryways into the neighborhood off Arlington Blvd.

Plan History

The Arlington Heights Neighborhood Conservation Plan was [originally accepted by the County Board in 1980](#). Arlington Heights Civic Association (AHCA) adopts this plan update as a vision for the neighborhood that supports improvements but also preserves the quiet, small-town character of Arlington Heights.

This update reflects concerns that come with changes in demographics, density, traffic, real estate trends, demands for county and school programming, and growth and development along Columbia Pike. These changes place additional pressures on Arlington Heights that this plan is meant to address.

Public involvement in the update was extensive, including a neighborhood survey, public comment, and a public meeting. Notice was provided to all residents through the distribution of a special edition newsletter, posting on the AHCA e-mail list and on the AHCA web site. The public comment draft of the plan was made available on the Internet and in the reference section of the Columbia Pike Library. Arlington County staff reviewed and commented upon drafts, and assisted in the collection of data for and publication of the updated Plan. Beginning in June 2006, members of the AHCA Neighborhood Conservation Committee (Richard Bullington-McGuire, Anthony Halloin, Juliet Hiznay, Lynn Michaels, Sean McNamara, and Kenneth Poole) prepared the plan working from an earlier draft of the plan dating to 2003. The plan was updated in concert with the AHCA Executive Committee and other residents. AHCA is committed to

working constructively with Arlington County on all areas of concern, and reserves the right to revise this plan as necessary to address the neighborhood's position on future issues.

Overview of the Neighborhood Survey

A survey was distributed to every household in the neighborhood in the fall of 1999. (See Appendix: Arlington Heights Survey Results) The survey showed that Arlington Heights residents have many positive reasons for choosing to live here: well-built homes, mature trees, good neighbors, good location, and comfortable atmosphere. Virtually all respondents expressed a desire to maintain the community's quiet, small-town character.

Major concerns include pedestrian safety, use of neighborhood streets for cut-through traffic, and the resulting noise and air pollution. Another significant concern is the lack of parkland, and the limited ability to use the open space that is available, due to heavy use for county and school programming. Respondents also commented upon the vital linkage between the preservation of the character of Arlington Heights and the revitalization of Columbia Pike.

Neighborhood Conservation Survey results were used in developing the recommendations contained in this Neighborhood Conservation Plan. The Survey results have been supplemented in consultation with the AHCA Neighborhood Conservation Committee and the Executive Committee to account for the 2000 census data and other changes to the neighborhood since the survey was completed.

Neighborhood Characteristics

A Brief History of Arlington Heights

The Arlington Heights neighborhood was included, along with the rest of Arlington County, in the 10 miles square federal district proposed by President George Washington in 1791. Arlington Heights appears on early 19th century maps as a farm that was included in the Custis family estate in the plateau area, which now includes portions of the Penrose neighborhood. It is unclear without further research in land records whether this area included the existing Arlington Heights neighborhood. However, it seems very likely that the name "Arlington Heights" was selected as a historical reference to these areas in the Custis Estate. The Custis estate stretched from present-day Arlington Cemetery west, and included portions of the current Barcroft neighborhood.

The Custis mansion and the surrounding 1,100 acres remained in the Custis family estate until the Civil War, when the house and land was confiscated by the United States government, and offered for sale. It was purchased by the tax commissioner for government use, and later appropriated by the Union army for use as a military burial ground. In 1882, the Supreme Court ruled that the property should be returned to Custis family heir, George Washington Custis Lee,

on the grounds that it had been confiscated without due process. In 1883, the United States Congress paid Mr. Custis \$150,000 for the property.

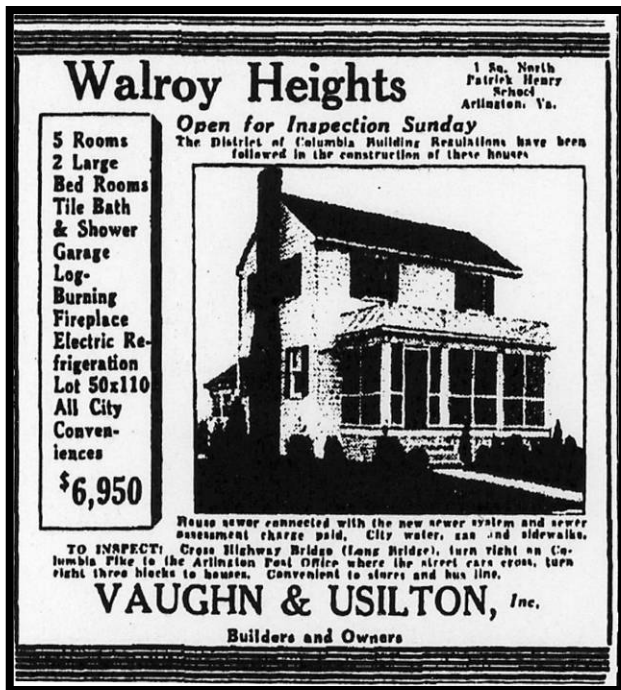

After the Civil War, the farm area, then known as the Arlington Heights, was subdivided and developed with various sections being renamed, such as Penrose, which was platted and subdivided in 1882. Of the local neighborhoods in this area in or near the Custis estate, only the Arlington Heights neighborhood retains the old name of the property shown in 19th Century maps.

Arlington Heights today is bounded by Arlington Blvd on the north, Columbia Pike on the south, S. Glebe Rd. on the west, Fillmore St./S. Walter Reed Dr. on the east. The history of the surrounding area, its homes, and events has well been documented in the Columbia Heights Neighborhood Conservation plan by Arlington historian Sarah Collins. The following history is just glimpse of the past unique to Arlington Heights.

Franklin D. Roosevelt's New Deal initiatives, established from 1933 to 1938, launched a population boom for Arlington and Arlington Heights. These initiatives provided a welcome economic relief and recovery to workers during the Great Depression. The New Deal created federal jobs and with those new jobs the New Deal also created a housing demand in all areas surrounding the jobs. In 1934 Federal Housing Administration (FHA) was established offering insurance on loans to families buying new homes. In addition, FHA reformed mortgage terms to provide even repayment schedules. The New Deal jobs, housing demand, and the new FHA banking regulations all cleared the path for growth and home ownership in Arlington.

Two enterprising young Arlingtonians, Walter Vaughn and Elton Leroy Usilton, capitalized on the housing demand and the improved FHA baking regulations and formed Vaughn & Usilton, Inc. It was this building and real estate firm that built most of Arlington Heights between the 1930's and 1940's, including duplex homes and the Dominion Arms, as well as Faith Lutheran Church on Arlington Blvd. in Ashton Heights.

An April 7th, 1935 Washington post advertisement, shown below, depicts the first homes for sale built by Vaughn & Usilton, Inc. These Arlington Heights homes are located along 7th and Highland Streets South. The name "Walroy Heights" in the advertisement is a mix of Walter Vaughn & Elton Leroy Usilton's first names. Although "Walroy Heights" was never established; the name of Vaughn & Usilton and their reputation for quality was established and is still well know today. The Vaughn & Usilton homes boast of radiant heat, cedar closets, all brick veneer and a solid construction not equaled in home construction since the New Deal era. Many Vaughn & Usilton homes have beautiful chestnut millwork as a trademark. By 1937 Vaughn & Usilton, Inc. had their small sales office at the SW corner of 2nd and Irving Streets South and were building homes on S. Irving St. S. Ivy St, 3rd St S., and 5th St. S.

Washington Post Advertisement, April 7, 1935

Leroy "Roy" Usilton, 1944

In 1938, Mr. Usilton completed and moved into his own Arlington Heights home on 3rd St. S. He raised his family here and remained at this residence the rest of his life. He was active in civic affairs, serving as president of the Chamber of Commerce and a member of the Arlington Kiwanis Club in the 1940s. During World War II, Mr. Usilton became chairman of the Arlington Chapter of the American Red Cross Blood Donor Service and his son, Leroy "Roy" Usilton, a Washington-Lee graduate, became a Navy fighter pilot (pictured above in front of 305 and 309 S. Irving St.). On March 16, 1945, the Sun Gazette Newspaper ran an article regarding his leave back home.

Photo of Arlington Heights duplexes, built by Vaughn & Usilton, looking west (1939).

One remaining historic landmark in the neighborhood is

the Arlington Cinema & Drafthouse building located at 2903 Columbia Pike. This 1939 art deco style building was known as the Arlington Theatre.

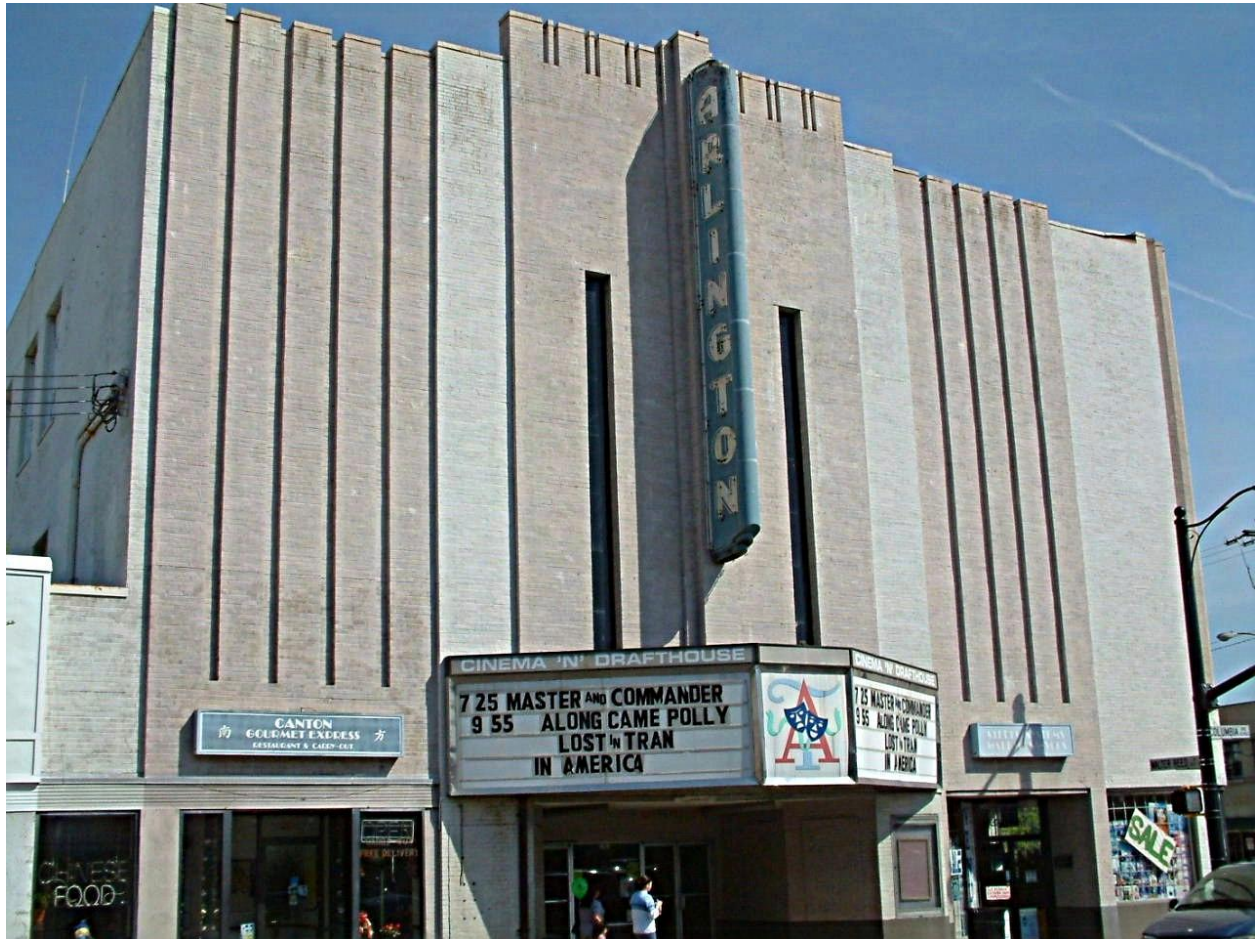

Photo Credit: Jill Lewis

The area behind the theater was also once a recreation center, which included a bowling alley. In 1985, the theater closed as a first-run movie house, and was reborn as the Cinema & Drafthouse, which is an important entertainment venue on Columbia Pike, offering an array of live entertainment and second run movies, as well as food and drink.

Patrick Henry Elementary School, located at 701 S. Highland St., was established in 1925. It replaced the Columbia School, Arlington County's first public school. In 1959, Patrick Henry Elementary School became the first integrated public school in Arlington County. The school was rebuilt in 1974, and was renovated and expanded in 1993. In 2006-07, the school had 346 students enrolled in pre-K to 5. Patrick Henry Elementary School is also the site of one of the two playgrounds in the Arlington Heights neighborhood.

The seventies brought major construction projects to the Arlington Heights neighborhood, with the addition of a number of public facilities. In 1971, Thomas Jefferson Middle School (TJMS) was built at 120 S. Old S. Glebe Rd. TJMS also became a joint-use facility with a community

center run by the Department of Parks, Recreation and Cultural Resources. The community center is an invaluable county asset and the site of numerous recreational and social activities, the most notable of which is the annual Arlington County Fair.

Shortly after Patrick Henry Elementary School was rebuilt in 1974, the Career Center was built on the same site at 815 S. Walter Reed Dr. The Career Center became the new location for the Columbia Pike Library. The Columbia Pike Library was originally founded in 1930 by the Women's Club of Arlington, and was then known as the "Arlington Library." The library was taken over by Arlington County in 1936, and at one point was housed in the Columbia School. To this day, the Columbia Pike library remains located in the Career Center, which also offers educational enrichment and adult education programs.

During the 1960s, the decision was made to run Metro down Wilson Boulevard rather than Columbia Pike. This decision was to have long-reaching impacts on the Pike. Arlington County struggled for years to establish a plan for the Pike. In 1986, the Columbia Pike Revitalization Organization was established, with the objective of revitalizing areas outside the Arlington Heights neighborhood. However, in 1996, the Arlington County Board adopted a proposal from CPRO to focus revitalization from the county line with Fairfax to the Pentagon. Beginning in 1998, work began on the Columbia Pike Form Based Code, which now applies in areas of the neighborhood's southern boundary with Columbia Pike.

The Residents: Arlington Heights Census Data

The 2000 census data for Arlington Heights reflects a prosperous and increasingly diverse population, living in a stable and conveniently located neighborhood. (See Appendix: Arlington Heights Census Data) The 1999 Arlington Heights household income of \$68,312 was 8 percent higher than the county median. The 58.5 percent homeownership rate in Arlington Heights was also much higher than the county median of 43 percent. In 2000, nearly half of area residents reported a commuting time of 24 minutes or less, and 3 percent reported working from home.

Some of the biggest demographic shifts seen in the neighborhood were in age and ethnicity. According to the 2000 Census, the number of residents in Arlington Heights increased 8.1 percent from 1990, with 2,433 residents living in 1,047 households. At 51.5 percent of residents, males slightly outnumbered females. The number of school-aged children increased 31 percent from 1990 to 2000. Although there was no increase in the number of children aged 0-5 years from 1990 to 2000, residents perceive a substantial increase in the number of children aged 0-5 since 2000. This is based on observation, as well as an apparent increased demand for preschool slots. The age group that saw the largest increase since 1990, were those aged 45-64 years. This group increased an astonishing 64 percent, to 592 residents. Meanwhile, the number of seniors aged 65 and above declined eight percent to 189 people. Residents ages 18-44 also declined 8 percent to 1,223, which represents slightly more than half the neighborhood population. These changes suggest a turnover in housing stock from the elderly to the middle aged. Although there

is no census data to support it, since 2000 there also appear to be more families with young children in the neighborhood.

Arlington Heights is an increasingly diverse neighborhood. According to the 2000 census, 30 percent of residents were born outside the United States. Of these foreign born residents, over one-third were naturalized citizens. According to the U.S. Census, the number of Hispanic residents more than doubled from 1990 to 2000 to 518 people, or 21 percent of residents. During the same period, Asians or Pacific Islanders increased by 25 percent to 254 people. Meanwhile, the number of “non-Hispanic Whites” and “Blacks” both declined. Of 2,320 respondents, 26 percent of 2000 Census respondents reported they speak Spanish. Eight percent of respondents reported they speak English “not well” or “not at all.” This statistic is important. Lack of proficiency in English may present an obstacle to participation in the civic association and other neighborhood activities.

Along with the rest of Arlington County, Arlington Heights has a very high educational attainment. The 2000 Census demographics on educational attainment show that educational attainment in Arlington Heights is lower than the county average. This may be surprising in light of the higher than county median income levels and homeownership rates in the neighborhood.

According to the 2000 Census, about half of Arlington Heights residents reported having a bachelor’s degree or higher education, while 23 percent reported having a master’s degree or higher. While impressive, these numbers are below the county averages of 60 percent for bachelor’s degree or higher education, and 31 percent for master’s degree or higher. The neighborhood population reporting that they had not completed high school or an equivalency was 12 percent, which is close to the county average. Those reporting occupation in the 2000 Census showed an occupation breakdown as follows:

Occupation Reported by Arlington Heights Residents	Percentage
Management, professional or related occupations	57
Sales and office administrative	19
Service	15
Construction or related occupations	6
Transportation or production occupations	3

Housing

The housing stock in Arlington Heights consists largely of single-family and duplex homes built mainly from the 1890s to the 1950s. The housing appendix provides a breakdown of the housing stock. During the building boom of the 1970s and 1980s, the neighborhood adds newer homes and converted former boarding houses that previously served as government-subsidized residences. The single family housing stock also includes a large number of brick “center-hall” colonials mixed with wood-framed farmhouses. The multi-family units include many older semi-detached duplexes and row-style townhouses. In addition, the neighborhood has one 1940s garden-style condominium complex (the Arbors) and one high rise apartment building (Dominion Arms) built in 1955.

Between 1990 and 2000, the neighborhood had only 18 new housing units added to its physical stock. The last major multi-unit residential development in the neighborhood consisted of an eight-unit townhouse-style complex built at the southeast corner of Glebe Rd and 5th St. S. in the late 1990s. Today, new houses in the neighborhood consist almost exclusively of in-fill single-family units built on subdivided lots or teardowns of existing residential structures.

There is one home of particular interest in the neighborhood. Between 1949 and 1950, Carl Strundland's Lustron Corporation constructed 2,560 porcelain-enameled steel ready-to-assemble homes. Today only a handful of Lustron homes across the United States are left, one of which is located in Arlington Heights on 2915 7th St. S. The homes were shipped in 3,000 pieces on a uniquely designed truck, and were available in gray, pink, aqua, blue and tan. The design of the Lustron home used every spare inch of space with a built-in buffet in the dining room and a built-in vanity in the bedroom. The Lustron Corporation failed in 1950 due to cost overruns and, in part, to the difficulty in moving and assembling the homes. However, the homes have stood the test of time, bearing the original siding, roof and built-ins.

Businesses in Arlington Heights

A variety of business establishments are concentrated around the periphery of the neighborhood along S. Glebe Rd. and Columbia Pike. These businesses offer many amenities to the residents and contribute greatly to the vibrancy of the community. Not surprisingly, the diversity of the neighborhood is reflected in the businesses as well. This is particularly evident from the variety of cuisines served in neighborhood restaurants, including Chinese, Ethiopian, Italian, Peruvian, Salvadoran, and Thai.

Neighborhood businesses offer many entertainment options as well, including live music, stand-up comedy, televised sporting events, CD release parties for local bands, and wine tasting events. The Arlington Cinema & Draught House is a draw to the neighborhood because it offers something special: second run films and live entertainment can be viewed while you eat and drink. Columbia Pike has become a center for live entertainment. Two annual street festivals hosted in the neighborhood, the Columbia Pike Blues Festival and the Columbia Pike Arts and Jazz Festival, add to the liveliness of the area.

Despite the many excellent features of the business environment in Arlington Heights, there are many improvements to be made. Some storefronts along Columbia Pike sit dormant. Others

change hands frequently. Some businesses have failed to maintain their properties. These are all symptoms of a failure to attract and keep healthy businesses. Residents are hopeful that revitalization will soon begin in earnest. It is anticipated the redevelopment of nearby Penrose Square, a mixed-use development approved by the County Board in 2006, will stimulate growth in the neighborhood. Long-term commitment from the County will be needed to stimulate growth while balancing the needs of the neighborhood.

Transportation decisions are also likely to be critical to businesses in the area. In April 2006, AHCA voted to support a recent proposal to build a trolley line from Pentagon City to Bailey's Crossroads running along Columbia Pike and up Jefferson St. in Fairfax County.

County and School Facilities

Arlington Heights is home to an unusual number of county and school facilities relative to the size of the neighborhood. Two large school and county joint-use campuses are located in Arlington Heights. The joint-use aspect of these facilities is significant. It creates greater demands upon the facility. Further, since the County Board and School Board are separately elected, they have separate budgets and necessarily have different programming priorities. While joint-use creates some efficiency for the county, in general, it complicates matters. There can be ongoing questions regarding responsibility for capital and maintenance expenditures. There can be disagreements about when improvements can and ought to be made. This has not always been positive for Arlington Heights.

The Thomas Jefferson campus is a joint-use facility between Arlington Public Schools and the Arlington County Department of Parks, Recreation and Cultural Resources. The campus is home to the Thomas Jefferson Middle School (TJMS), an International Baccalaureate Middle Years School, and the Thomas Jefferson Community Center. TJ Community Center has indoor and outdoor facilities. Indoors, it features: a meeting room; game room; art studios for pottery, photography, jewelry and wood working; a gymnasium with a track, fitness machines, and weight room, as well as locker rooms with public restrooms, showers, and saunas. Outdoors it features: a pre-school playground; lighted basketball and tennis courts; lighted soccer fields; a fitness trail; and a par course.

The Patrick Henry campus is a joint-use facility between Arlington Public Schools and various Arlington County departments. Located one block from Columbia Pike, it is bounded by S. 7th St., S. Garfield St., S. Walter Reed Dr., and S. 9th St. The campus includes: Patrick Henry Elementary School, playground, garden, and field; the Fenwick Center; the Career Center; and the Columbia Pike Library. Among other programs, the Career Center offers vocational, technical, academic and enrichment programs to adult students and children in elementary school through high school. The County recently renovated the Fenwick Center, which houses various Department of Human Services programs, mostly geared toward seniors, and includes special medical facilities.

These facilities offer many benefits and resources to residents, but also create some pressures on the neighborhood with regard to pedestrian, automobile traffic, parking, and littering. Both campuses are under review by Arlington Public Schools as this plan goes to print. Arlington

County School Board appointed committees are examining redevelopment options for both Thomas Jefferson Middle School and the Career Center (which includes the Columbia Pike Library). These sites are defining features of the neighborhood. Their use and redevelopment will impact county programs as well as school programs. Therefore, this process is of great interest to Arlington Heights residents.

Houses of Worship

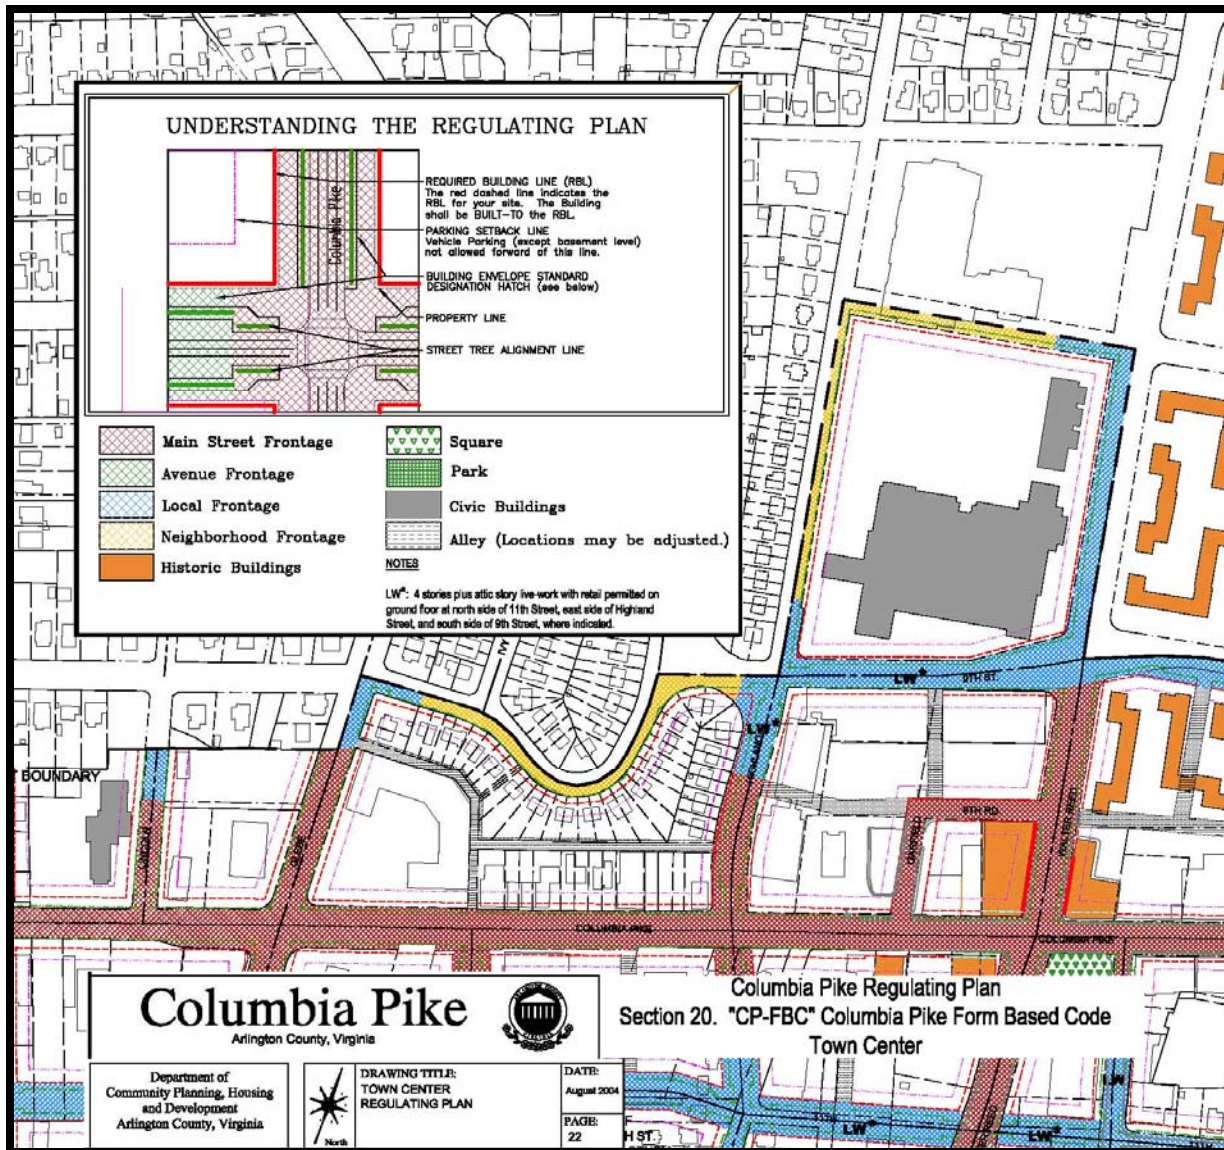

Arlington Heights is proud to have the Arlington-Fairfax Jewish Congregation of Etz Hayim in the neighborhood. Etz Hayim is the only synagogue in Arlington. Among other services offered by Etz Hayim, the preschool serves as an important resource for young families in the neighborhood.

Columbia Pike Revitalization

Arlington Heights sits on the east end of Columbia Pike, where south Arlington's "Main Street" serves as a southern neighborhood boundary. To be economically vibrant and attractive, Columbia Pike must be surrounded by safe and pleasing neighborhoods. As part of the "Town Center" for Columbia Pike revitalization, AHCA is actively engaged with the Columbia Pike Revitalization Organization.

After 20 years of work to promote Columbia Pike through government policies, the Pike is on cusp of a major revitalization. Successful preservation and enhancement of the neighborhood is directly linked to successful capital improvements realized in the Columbia Pike Initiative. The Arlington Heights portion of the "Town Center" Columbia Pike regulating plan is shown below.

Columbia Pike revitalization is to be implemented with the help of the [Columbia Pike Form Based Code \(FBC\)](#), a community-designed and driven development approval process. This optional process allows developers to expedite project approval and obtain economic development incentives. The FBC focuses on three areas: (1) the property location within one of several Columbia Pike revitalization districts, (2) the building form and use according to a variety of height, facade, siting, and use standards, and (3) architectural standards for building materials and configuration.

Columbia Pike Town Center Regulating Plan: Detail of Arlington Heights (Credit: Arlington County DCPHD)

Under the FBC, for those projects smaller than 30,000 square-feet, which build on properties smaller than 40,000 square-feet, builders may use a by-right development option that does not require public hearings. Larger projects may be approved through a 55-day special exception/use permit option, assuming the proposal conforms to the FBC. The FBC process is unique in that it provides a clear set of standards developed in collaboration with community leaders in advance of development proposals. Civic association representatives from neighborhoods within the revitalization zone work closely with county staff to ensure that any development proposals conform to the FBC. Parking for project proposals will be handled through reinvestment of new tax revenues to support shared public parking facilities along the Pike. Since the FBC's adoption in February 2003, the County reports that nearly \$500 million in projects have been approved in the revitalization zone. Thus far, these projects include 16 townhouses, 269 condominiums, 40,000 square feet of retail space, and nearly 500 underground parking spaces.

Projects to underground utilities have made a significant difference in the appearance of Columbia Pike. The portion of undergrounding that borders Arlington Heights has been planned but is not yet completed. Underground banks have been installed, with utility lines running underground from S. Walter Reed Dr. to S. Monroe St. The next phase of the project, connecting the utilities to individual businesses on this stretch of Columbia Pike is currently underway. After this is completed, streetscape beautification consistent with the Form Based Code will begin.

Neighborhood Goals

The overarching neighborhood goal for Arlington Heights is to preserve the small town feel of the neighborhood. If not addressed appropriately, pressures from increased population density, traffic, and demand for services at school and county facilities within the neighborhood are potential threats to this goal. Included among the important neighborhood goals are, in no particular order:

1. Maintain, enhance and promote the single-family residential character of Arlington Heights
2. Improve pedestrian safety, promote walking and bicycling, and reduce motor vehicle speeds, and accidents through a combination of improvements to street design, maintenance, signage, traffic enforcement, and traffic calming (where necessary).
3. Reduce cut-through traffic.
4. Ensure adequate parking in anticipation of increased demand with redevelopment of public facilities and the revitalization of Columbia Pike.
5. Improve the quality of commercial buildings and commercial establishments along Columbia Pike to blend with the residential community and provide an attractive commercial area.
6. Enhance the accessibility and use of local parks by residents through improved parks and increased green space.
7. Preserve and enhance the environment through creation of green space and education of neighbors (e.g., on conservation of resources, including recycling, no littering, no dumping in storm drains, planting of trees and plants, non-use and eradication of invasive plant species from neighborhood yards and gardens).
8. Enhance the appearance of Arlington Heights by undergrounding utilities, which will also reduce power outages and damage to trees.
9. Enhance public transportation while reducing noise and pollution.
10. Work to enhance local public schools, and improve the prestige of those schools.
11. Upgrade and maintain existing county and school facilities in the neighborhood.
12. Ensure police protection and emergency services that will reduce crime and improve emergency response time.
13. Improve storm drainage.
14. Increase enforcement of county ordinances.
15. Increase participation in the Arlington Heights Civic Association.

Growth and Development

Arlington Heights residents support the Columbia Pike Form Based Code, but are anxious to retain the quiet, small town character of the neighborhood. This will require a careful balance. Residents support revitalization of the Pike, but are not willing to trade off the pleasant and relaxed environment in Arlington Heights. The cultural impact seen from the type of development in Clarendon, for example, would be unacceptable to many residents of Arlington Heights. The AHCA is committed to engaging on an ongoing basis with the business community, Columbia Pike leadership, Arlington County, and Arlington Public Schools to ensure mutually advantageous growth and development along Columbia Pike.

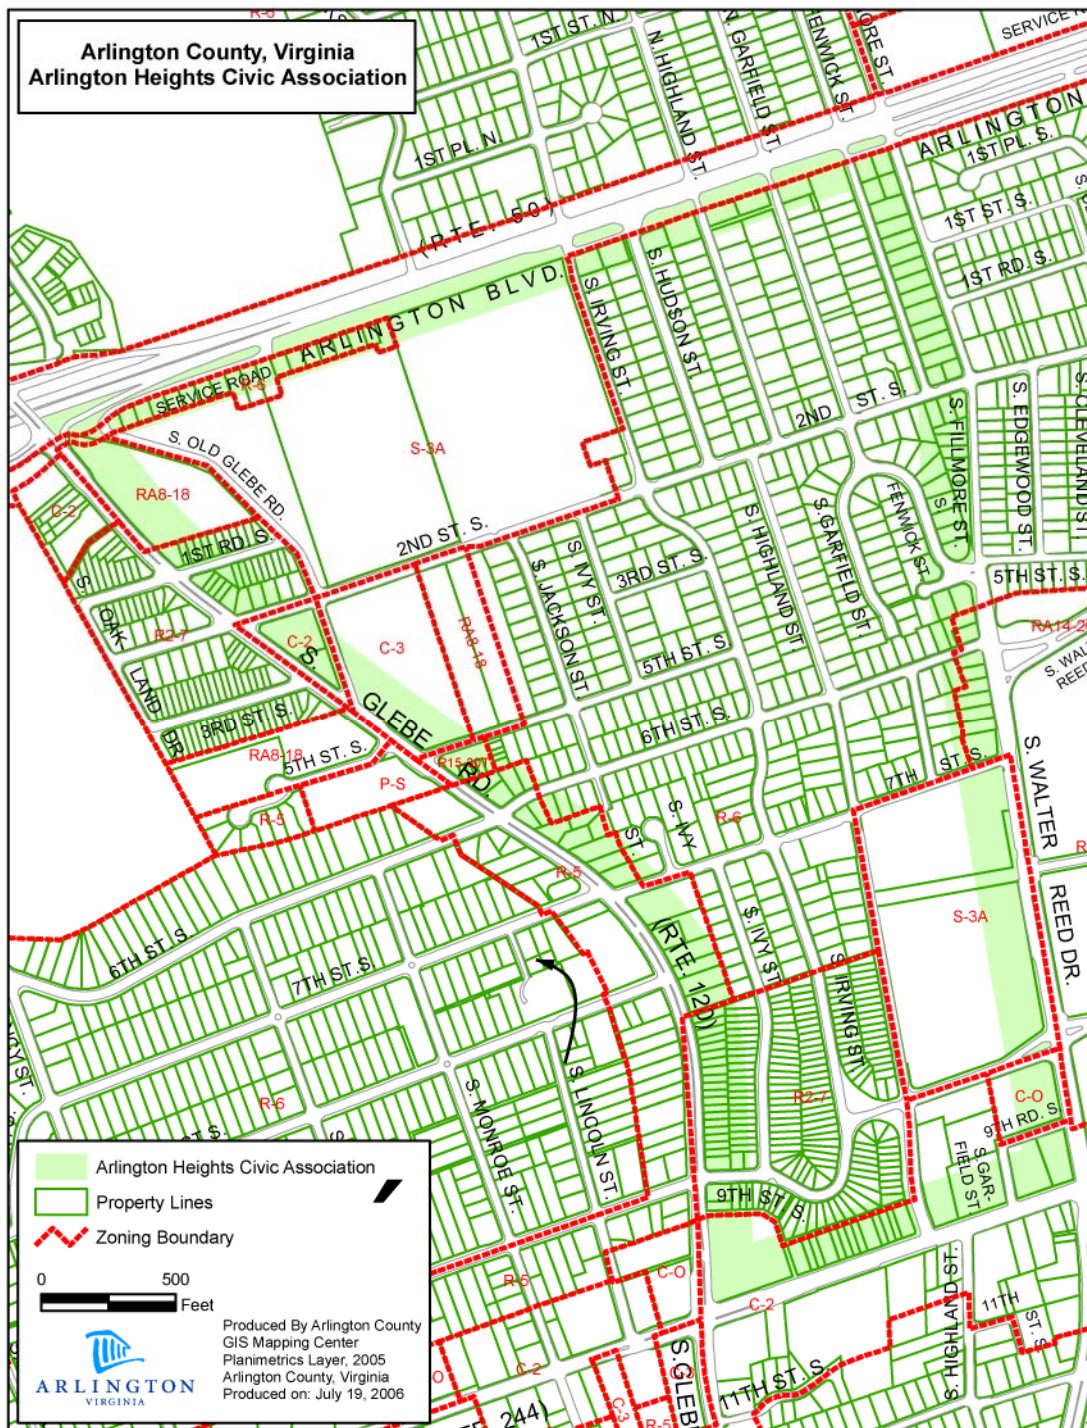

Zoning and Land Use

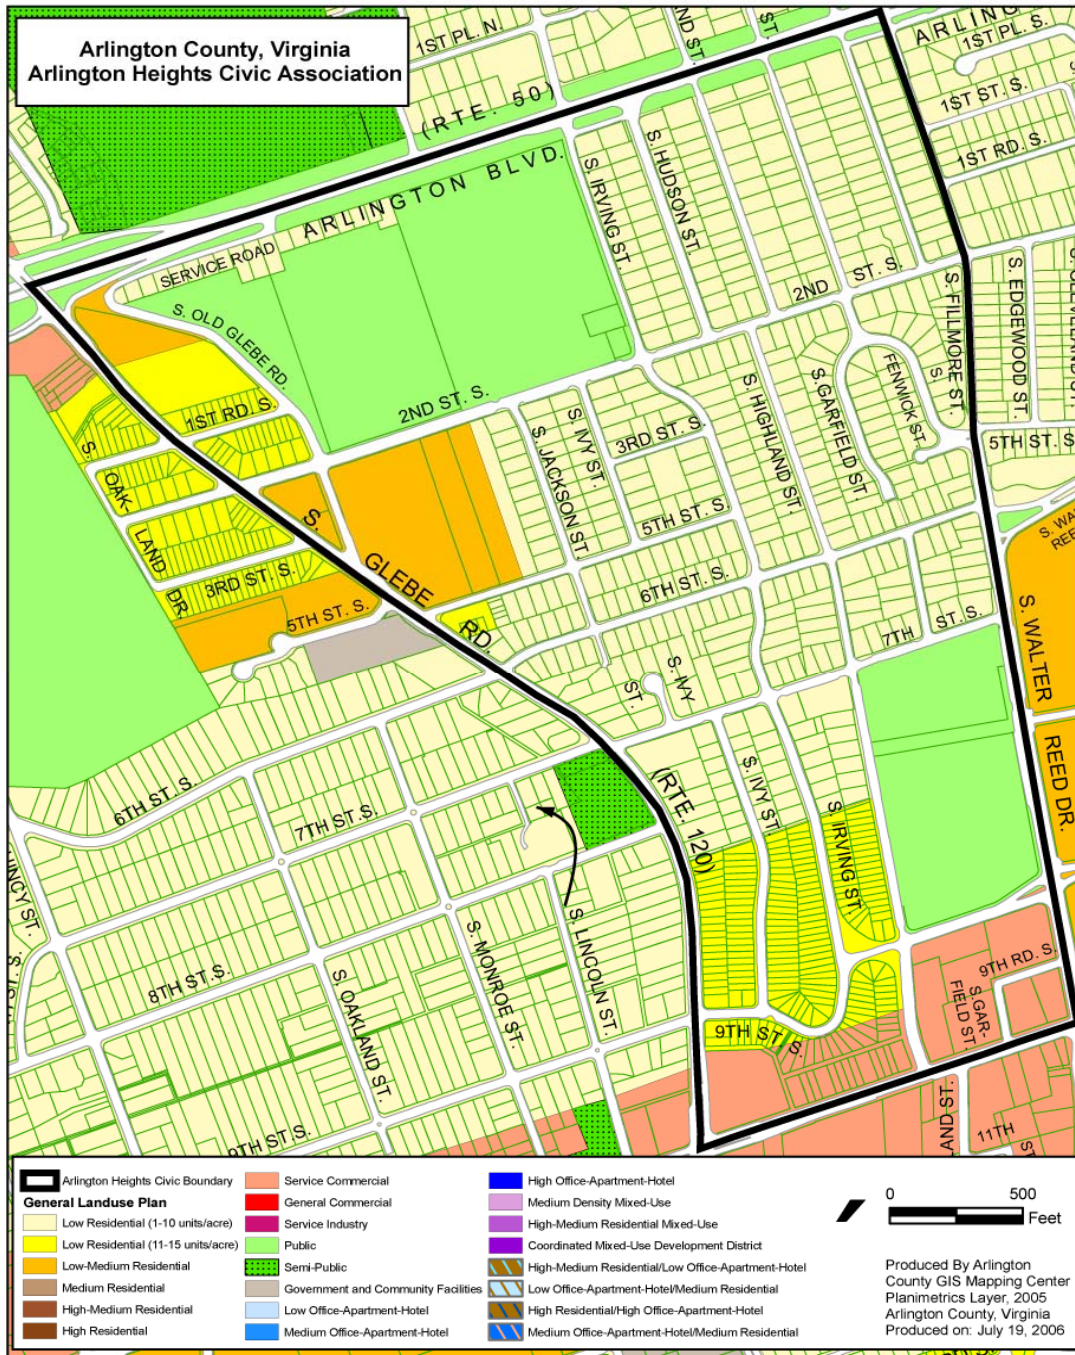

Residents strongly wish to preserve the current zoning of the neighborhood, and oppose any changes to the General Land Use Plan (GLUP) that would increase the density of the neighborhood, except as explicitly permitted in the Columbia Pike Form Based Code. The zoning and GLUP maps for the neighborhood are shown on the following two pages.

Arlington Heights is zoned primarily for low-density, single-family residential uses (R-6). Some areas along the western and southern edges of the neighborhood are zoned for semi-detached houses and townhouses (R-5, R2-7, and R15-30T).

The western boundary of the neighborhood along S. Glebe Rd. between 2nd St. S. and 5th St. S. contains high-rise apartments and commercial areas (C-2 and C-3), including the 7-11 and Exxon gas station located at 2nd St. S. and S. Glebe Rd. The entire southern boundary of the neighborhood along Columbia Pike between S. Walter Reed Dr. and S. Glebe Rd. is zoned for either general commercial or service commercial (C-0 and C-2). This southern boundary is included within the "Town Center" area of the Columbia Pike Revitalization Plan.

AHCA also notes that the General Land Use Plan Map, shown below, identifies a section of 9th St. S. between S. Highland St. and S. Glebe Rd. S. as "service commercial," rather than low residential (11-15 units/acre). This error needs correction.

Land Use and Zoning Recommendations:

1. Ensure that future residential development is of the same character, with consistent density standards.
2. All commercial development, large apartment complexes and schools should continue to be located on the periphery of the neighborhood, and the interior areas should continue to be zoned exclusively for single-family homes.
3. Replacement of single-family housing in areas zoned R-6 should be replaced only with single-family housing, or be acquired by the county for parkland use. For example, “Fourth of July” Park at the corner of S. Garfield St. and Arlington Blvd. was converted from an empty lot to parkland.
4. Renovations and any 'infill' development should be consistent with the existing architecture and scale of nearby homes.
5. No habitable housing should be lost from family-type housing stock for reasons of commercial development, upzoning or apartments, or to create or widen roadways.
6. The GLUP map for Arlington Heights should be revised to reflect the existing use of all residences on 9th St. S., which is Low Residential (11-15 units/acre), rather than service commercial.
7. It should be noted that the county-owned parkland known as “Fourth of July” Park and the new parkland at on the southeast corner adjacent to the Thomas Jefferson site are zoned R-6 rather than S-3A.
8. It should be noted that the Etz Hayim Congregation, a house of worship, is zoned R-6, rather than S-3A.
9. Arlington County should continue programs to promote home ownership, rehabilitation of all homes in disrepair, and the preservation of existing single-family housing stock.
10. County ordinances relating to maintenance of property should be strictly enforced. This is particularly important in cases of absentee landlords/owners for both residential and commercial properties.
11. For those owners who cannot maintain their homes for physical or financial reasons, the county should work to develop programs that will make it possible to bring their property into compliance with community standards.
12. Residents support property tax relief programs for those on fixed incomes. Such programs increase the likelihood that residents on fixed incomes will be able to maintain their homes.
13. In addition to official County government efforts, AHCA supports voluntary, community-based efforts to assist neighbors with housing repairs and cosmetic improvements.

Historic Preservation

Arlington Heights is one of three Arlington County neighborhoods currently nominated for listing in the National Register of Historic Places. The Virginia State Review Board is scheduled to discuss and vote on this nomination at its December 5, 2007 meeting. A state-hosted public meeting was held at the Arlington County Board room on November 5, 2007. Due to the private property interests at stake for each homeowner in the neighborhood, the AHCA has chosen not to take a position on the nomination of the neighborhood.

The nomination (<http://www.arlingtonva.us/Departments/CPHD/ons/pdf/page56988.pdf>) states that there are 737 contributing properties for the nomination, and 162 non-contributing properties within the neighborhood. The period of significance is noted as 1909-1957. Architectural styles listed for contributing properties are described, generally, as Late 19th and 20th Century Revival (Colonial Revival, Tudor Revival, Craftsman) and Mid-20th Century Modern Movement.

Commercial Neighbors

Residents recognize the benefit of the goods and services businesses now provide, and hope these can be preserved. At the same time, the residents recognize that the County's efforts to encourage maintenance and improvements to the Columbia Pike revitalization zone have not been adequate. The residents encourage the County to make the infrastructure investments necessary to revitalize Columbia Pike. The residents applaud and support the County's efforts to help revitalize the area by providing technical and planning assistance and redevelopment grants.

Residents recognize the risks inherent to revitalization -- that property owners may not be willing to invest in improving their properties, that construction may take time and make matters worse temporarily, and that small businesses may not survive during construction.

Residents welcome commercial establishments in the neighborhood. However, businesses have not always properly maintained their property. In particular, rusting signs, peeling paint, litter, and uncollected refuse have a negative impact on the appearance of Arlington Heights. Such maintenance issues should be addressed promptly.

For the commercial areas in our neighborhood, residents identify the following goals:

1. Actively engage businesses and the county concerning future planning of commercial areas in Arlington Heights.
2. Work with county and business owners to improve the appearance of business grounds.
3. Support and patronize businesses at Dominion Arms and Westmont Shopping Center and on Columbia Pike so they can continue to sell high-quality goods and services at moderate cost.
4. Attract more customers to commercial establishments in the neighborhood.
5. Improve public safety.
6. Increase neighborhood youth employment and training.

Commercial Neighbors Recommendations:

1. Emphasize the strengths of Columbia Pike: its vibrancy, live music, diversity, self-sufficiency, and pedestrian convenience.
2. Establish a signature concept to support live arts and entertainment on Columbia Pike.
3. Continue to support the use of outdoor space for street festivals.
4. Encourage outdoor dining to enliven Columbia Pike.
5. Encourage clean up and beautification projects to visually enhance the area and improve the transition between commercial and residential areas.
6. Bury utility lines and improve road surfaces, curbs, gutters and sidewalks.
7. Make commercial areas more pedestrian-friendly.

8. Improve lighting by adding pedestrian friendly lights where they are lacking on all Arlington Heights streets in the revitalization district, to include Main Street Frontage, Local Frontage, and Neighborhood Frontage, as these are defined in the Columbia Pike Form Based Code.
9. Improve parking and loading areas.
10. Eliminate predatory towing practices, where this is an issue.
11. Support projects aimed at reducing traffic congestion.
12. Expand transportation options, such as mass transit.
13. Meet with business managers to encourage their participation in the civic association.
14. Encourage renovation of old buildings.
15. Work with property managers and the Arlington County Department of Economic Development to eliminate vacancies.
16. Work with county code enforcement staff to remedy all commercial code violations.
17. Shore up exposed wiring at former street-lighting base at northeast corner of Columbia Pike and S. Highland.
18. Work with the county and commercial property owners to address issues that arise with specific businesses.

Parking

Residents encourage the County to examine a solution to address expected increased demand for parking in the neighborhood. The Penrose Square project and the condominiums being built across Columbia Pike in Douglas Park will inevitably increase demand for services in the area, and thus increase demand for parking. The county has made numerous promises about developing "shared" parking along Columbia Pike in numerous public meetings but no additional public parking has been added to date. In addition to private revitalization along Columbia Pike, Arlington Public Schools is currently assessing plans to improve both Thomas Jefferson Middle School and the Career Center site. New uses at the Career Center site could require the need for additional parking. Thus additional parking pressures are anticipated from both public and private sources over the course of the next several years.

Parking Recommendations:

1. The county needs to develop and execute plans for handling parking as private and public revitalization occurs, producing additional pressures on parking near the Thomas Jefferson complex and the Career Center site.
2. AHCA recommends that the county construct a county-owned free or metered three-level parking ramp on the empty lot (RPC #25014002) at the northwest corner of 9th Rd. and S. Garfield St. If practical, this lot should be co-planar and connected to the existing underused parking ramp at the southeast corner of 9th St. and S. Highland St. (RPC #25014006), creating one easy-to-use parking area for all Columbia Pike businesses. The parking should be designed so adjacent businesses can take direct advantage of their proximity to newly created parking areas.
3. The neighborhood should work to better inform residents about options relating to zoned and permitted parking.

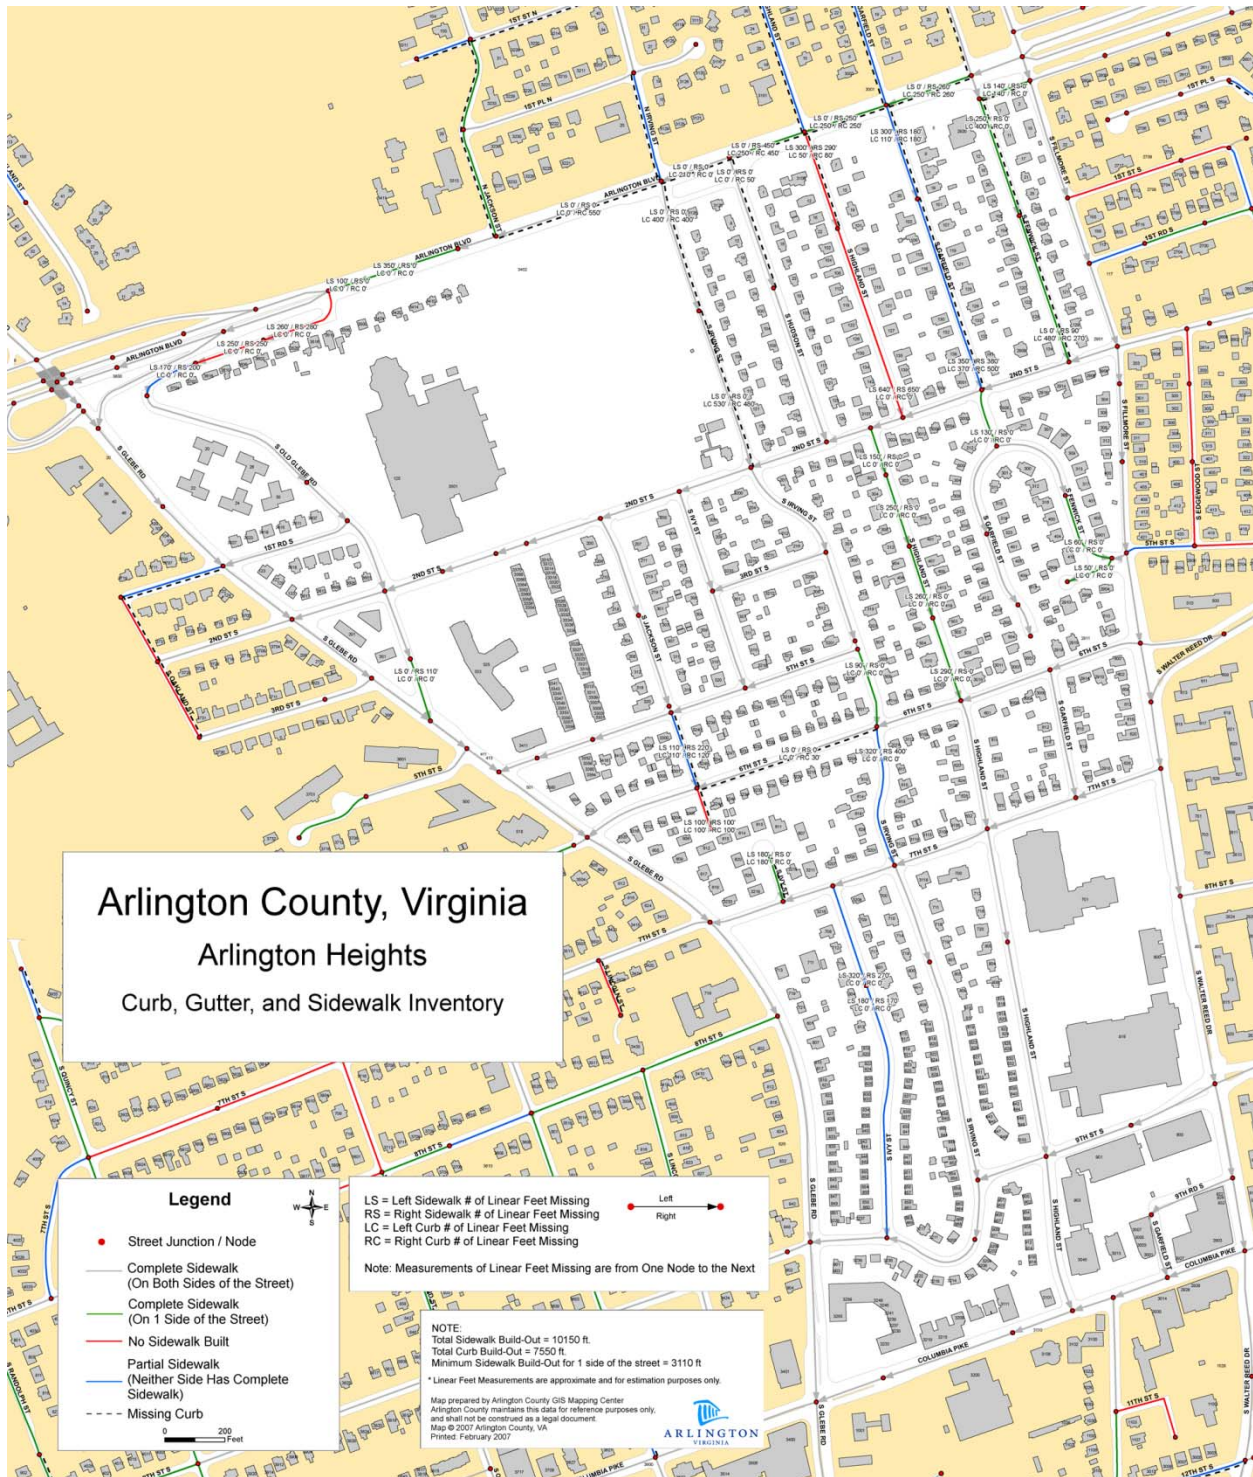

Neighborhood Infrastructure

Residents are concerned about personal safety and maintaining a good environment for raising children. Most of the concerns voiced by residents are about crime (especially gang activity, vandalism, and graffiti), pedestrian safety, parking, and littering. Enhancing and maintaining the neighborhood infrastructure can address many of these concerns.

AHCA is in an active partnership with the police and school authorities to prevent gangs from establishing themselves in the neighborhood. This partnership requires that the residents be out of their homes and on the streets, interacting with one another and looking out for their common interests. The neighborhood's pedestrian lighting, curb, gutter, and sidewalk initiatives are essential prerequisites to this strategy. In particular, lighting that lights the sidewalks under the tree canopy are critical to public safety in the neighborhood. Residents cannot preserve the neighborhood if AHCA's public safety strategy fails.

Streets, Sidewalks, Curbs and Gutters

Many streets in our neighborhood are missing curbs, gutters, and sidewalks. Additionally, many of the neighborhood's curbs, gutters and sidewalks are in need of maintenance and repair. According to survey results, Arlington Heights residents overwhelmingly support completing the entire network of streets in the neighborhood, with sidewalks, curbs and gutters on at least one side of every street. Except where impractical (e.g. insufficient space), sidewalks should be on both sides of every street. This will enhance walkability and pedestrian safety in the neighborhood. An inventory map shows where sidewalks, curbs and gutters are missing.

Arlington Heights Curb, Gutter, and Sidewalk Inventory (Credit: Arlington County CPD and GIS Mapping Center)

Proposed Neighborhood Conservation Projects

The primary way to improve neighborhood infrastructure is through the Neighborhood Conservation Program. There are six proposed sidewalk, curb, gutter, and streetlight Neighborhood Conservation projects that have been approved and prioritized by the AHCA, but still have not been funded by the county after several years. These projects are needed to improve public safety in Arlington Heights.

It should be noted that typically a neighborhood is only permitted three proposed projects at one time. Arlington Heights has been permitted to list six proposed projects that had already been proposed at the time that this rule was put in place. They are, in order, as prioritized by the neighborhood:

1. **S. Garfield St.:** The proposed project will include construction of new 4-foot wide concrete sidewalk, curb and gutter and a 1.5-foot utility strip on the west side (side opposite of the utility poles) of S. Garfield St. from Arlington Blvd to 2nd St. S. New curb and gutter will be installed on the east side of the street. Carlyle street lights will be installed in the utility strip on the west side of the street. The roadway width will be 28 feet and on-street parking will be allowed to continue on both sides of the street. Roadway will be restored with full depth paving.
2. **S. Fenwick St.:** The proposed project includes installation of curb, gutter and Carlyle street lights on S. Fenwick St. from Arlington Blvd. to 2nd St. S. The street will be approximately 26-foot wide. Carlyle style streetlights to be installed along the west side of the street.
3. **S. Irving St.:** The proposed project includes installation of new concrete curb and gutter and driveway aprons on both sides of S. Irving St. between Arlington Blvd. and 2nd St. S. The street width would be approximately 24-foot, with parking on the west side only. (There is an existing 4-foot concrete sidewalk and a 6-foot grass utility strip on the east side of the street). New Carlyle streetlights would also be installed along the east side of S. Irving St. Sidewalk replacement may be a necessary part of the project. The improvements will include any restoration resulting from the sidewalk, curb and gutter construction, such as grass and trees replacement.
4. **S. Ivy St.:** The proposed project includes installation of Carlyle style streetlights between 7th St. S. and 9th St. S.
5. **S. Highland St.:** The proposed project includes installation of Carlyle style streetlights between Arlington Blvd. and 2nd St. S. The scope of this project may be reassessed to include sidewalks, curbs, and gutters.
6. **5th St. S.:** The proposed project includes installation of Carlyle style streetlights between S. Glebe Rd. and S. Jackson St.

Streetscape and Street Signage Improvements:

The condition of the street markings and signage in the neighborhood also require considerable attention. Pedestrians are placed at significant risk at many intersections in Arlington Heights due to lack of signage and lack of crosswalks or other means of denoting pedestrian crossings. This problem is particularly acute on S. Glebe Rd. and at the intersection of S. Irving St. at Arlington Blvd. Appallingly, the intersection of S. Irving St. at Arlington Blvd. is an entry point

to one of the most heavily used recreation centers in Arlington County, and to the Thomas Jefferson Middle School, yet there is no crosswalk of any kind and no signage.

Photo credit: Juliet Hiznay

Where crosswalks exist, they are often misaligned with curb cuts, which creates a hazard for those with limited mobility. Crosswalks and stop lines are missing in many places throughout the neighborhood.

In 2001, AHCA's Pedestrian Safety Committee studied the condition of the streetscapes and signage in the neighborhood, and produced a [pedestrian safety motion that the association adopted](#) recommending specific improvements. Since then, the Neighborhood Conservation Committee has identified additional improvements and consolidated the recommendations together into a Street Improvements table (See Appendix: Street Improvements).

Street, Sidewalk, Curb and Gutter Recommendations:

1. Install sidewalks, curbs, and gutters, throughout the neighborhood, on both sides of every street, where practical.
2. Ensure that all neighborhood sidewalks are accessible to people with special needs.
3. Properly maintain the sidewalks, curbs, and gutters.
4. Align sidewalk curb cuts properly with crosswalks, using double curb cuts where appropriate, allowing those with strollers or in wheelchairs to cross the street without leaving the crosswalks.
5. Install vertical reflective tape on sign posts, such as stop signs and yield signs.

6. Make recommended streetscape and signage improvements set forth in this plan.

Utility Undergrounding

Multiple neighborhood goals would be served by undergrounding utilities currently carried overhead on telephone poles. Comments in the neighborhood survey indicated a desire for underground utilities. This would aid in beautification, accessibility, and reducing power outages. The overhead lines are unsightly and require utility companies to severely trim trees, reducing tree canopy. The lines also prevent property owners from planting trees in substantial areas of the neighborhood where lines run the length of private property. Utility poles interrupt sidewalks, making them impassible to wheelchairs on some streets. For example, the entire south side of 2nd St. S. in Arlington Heights has utility poles embedded in the sidewalks, in conflict with ADA requirements. In addition, power outages have been costly to residents. Power outages are frequent during heavy rains, causing sump pumps to fail and flooding basements.

Utility Undergrounding Recommendations:

1. Underground utilities whenever possible, especially in the revitalization district and along 2nd St. S.
2. Where possible, the undergrounding process should preserve existing tree canopy and provide opportunities for additional planting of canopy trees.

Streetlights

Survey results showed that a majority of our residents listed walking as their secondary or tertiary mode of transportation. It is not surprising that many complaints from our residents relate to pedestrian safety, the safety of property and the adequacy of police patrols. Adequate street lighting is an important factor in pedestrian safety and a proven deterrent to burglary and vandalism. For these reasons AHCA considers improved pedestrian friendly street lighting essential.

Overhead lighting designed to illuminate roadways for automobiles is not adequate to illuminate roadways and sidewalks for pedestrians. Because of the large trees lining neighborhood streets, cobra-style lights do not illuminate many of neighborhood sidewalks. Pedestrian-friendly lights should be used throughout the neighborhood to replace or augment existing cobra streetlights.

Further, Arlington County Police have advised residents that there are areas of the Thomas Jefferson Middle School and Community Center that are not safe to walk after dark. This is unacceptable for a school facility and for a community center that is open after dark almost daily. These safety issues can and should be addressed with pedestrian-friendly lighting in all areas of the complex that are currently unlit.

Arlington Heights Street Light Inventory (Credit: Arlington County CPHD and GIS Mapping Center)

Streetlight Recommendations:

1. Install Carlyle style lights throughout the neighborhood where they are lacking (see Streetlight Map)
2. Install pedestrian friendly lights along the entire length of the running trail at the Thomas Jefferson Community Center.
3. Install pedestrian friendly lights at Thomas Jefferson Middle School in areas on Old S. Glebe Rd. and in dark areas to the north of the school building.
4. Install pedestrian friendly lights along the bicycle path on Arlington Blvd.

Drainage

Residents in Arlington Heights are facing storm sewer and drainage issues that impact quality of life. This has become increasingly critical as the burden on the water and sewer system increases. The County needs to take action to correct four primary problems in the neighborhood. First, many of the drainage systems within Arlington Heights are unable to handle runoff during heavy rainstorms, which has caused water damage to basements in the neighborhood. Second, some homes experience back up of sewage into their homes. Third, stagnant water areas cause health problems related to mosquitoes. Finally, inadequate drainage causes environmental harm as runoff picks up waste on street surfaces, which eventually makes its way into the Chesapeake Bay.

Drainage Recommendations:

1. The county should work with VDOT to take corrective measures relating to drainage problems along Arlington Blvd.
 - 1.1. The service road between Irving St. and Hudson St. requires improvement. The service road has two homes on it, but no curbs or gutters, causing drainage issues. The grassy area between this road and Arlington Blvd. contains a large storm sewer that frequently does not drain properly and causes long-term stagnant water problems. It is improperly graded. Further, vegetation clogs the drain line from overgrowth and vegetation that is mowed but not cleared.
 - 1.2. Upgrade drainage between Arlington Blvd. and the northeastern edge of the Thomas Jefferson site, where the bicycle path crosses. This area often has standing water. A pipe under Arlington Blvd. ends with the blacktop and spills onto grass and the bicycle path. Further the drain on the other side of the bicycle path is clogged with vegetation, which causes water to pool and stagnate.
2. The proposed NCAC project on S. Garfield St. (discussed in the streets, sidewalks, curbs and gutters section) should be funded and completed. This is the first priority NCAC project for the neighborhood. Drainage is a serious problem on this portion of S. Garfield.
3. Address drainage problems at Arlington Heights Park, which has become known by neighbors at S. Irving St. and 9th St. S. as "Lake Irving."
4. Address drainage problems at S. Walter Reed Dr. at the Department of Human Services and the Columbia Pike Library
5. Address drainage problems on the east sidewalk of Highland St., especially beside the Career Center.

6. Improve drainage on the Thomas Jefferson grounds, including in the northeast field, south of the handball court (where a significant erosion problem exists), in the new park at S. Irving and 2nd St., and in other areas where standing water or erosion are problems.

Pedestrian & Bicycle Overpasses

Residents of Arlington Heights, the Thomas Jefferson Community Center, and bicyclists regularly use the overpass across Arlington Blvd., which links the Community Center to N. Jackson St. Maintenance and eventual replacement of this footbridge is important to Arlington Heights. The footbridge is rusting both on the structural supports and on the walkway.

Photo Credit: Richard Bullington-McGuire

Pedestrian & Bicycle Overpass Recommendations:

1. County staff should report to Arlington Heights regarding the condition of the footbridge and the timing of any maintenance or replacement.
2. Improve the appearance of the footbridge by sanding and painting it, or alternatively, replacing the footbridge.
3. Install sidewalks at the N. Jackson St. landing of the footbridge to improve pedestrian safety.
4. Build a second pedestrian and bicycle overpass across Arlington Blvd., near Fillmore St.
(Recommendation also appears in Transportation Section)

Community Entrances

Community entrances to Arlington Heights could use improvement. One of the major entry points to the neighborhood, S. Irving St. at Arlington Blvd., is in appalling condition. There are no street markings; the signage is inadequate, paving has not been done by the county because the street lacks curbs and gutters, sidewalks are not ADA compliant, and there is no crosswalk or stop line for cars.

Photo Credit: Juliet Hiznay

The lack of a crosswalk is particularly dangerous. Numerous high-speed accidents occur at or near this intersection every year. The AHCA is aware of at least one fatality of a resident during one such accident. The Irving St. project is in the NCAC queue of proposed projects for the neighborhood, but has suffered from the county policy of not paving streets that have no curbs and gutters. This portion of Irving St. needs paving, curbs and gutters, lights, a textured crosswalk, and pedestrian crossing signage. All entry points on the north side of the neighborhood with grassy areas between Arlington Blvd. and neighborhood streets need

improvement. Further, as the result of a subdivision, there is now a vacant lot at the corner of S. Fillmore St. and 2nd St. S. All of these areas beg for attention.

Community Entrances Recommendations:

1. Due to its location next to school and community center, the proposed Neighborhood Conservation project on S. Irving St. between Arlington Blvd. and 2nd St. S. should be given priority funding outside the NCAC program.
2. The county should work with the neighborhood to determine whether the empty lot at S. Fillmore St. and 2nd St. S. can be built upon, and if it cannot, determine options for beautifying the area.
3. Grassy areas separating Arlington Blvd. from neighborhood streets should be beautified with tree and shrub plantings.

Open Space and Recreation Facilities

Arlington Heights has four recreational open spaces. These are: Thomas Jefferson Middle School and Community Center, a 20.57-acre multi-use indoor and outdoor recreation area; a 3.5-acre playground at Patrick Henry Elementary School; Arlington Heights Park, a miniature park at the intersection of 9th St. S. and S. Irving Avenue; and another small park known as “Fourth of July” Park at the intersection of Arlington Blvd. and S. Garfield St.

These four parks provide Arlington Heights with 8.6 acres of park space per thousand people, compared to the National Park and Recreation Association's recommendation of 10 acres per thousand persons. Despite the significant park area in the neighborhood, access to recreational activities is inadequate for a number of reasons.

The space at the Thomas Jefferson complex and at Patrick Henry Elementary School is shared with Arlington Public Schools for use by students during school hours. Much of the remaining time for recreation at the Thomas Jefferson complex is taken up by countywide organized activities. Thus, access to the joint-use facilities at the Thomas Jefferson Center is heavily restricted. In sum, there is limited space available for neighborhood and family activities either for adults or children.

Improvement to Thomas Jefferson Community Center Grounds

The Thomas Jefferson Community Center is the most significant public site in our neighborhood. The president of the Arlington Heights Civic Association has written the County Board to request that the site be master planned, in coordination with the planning process for Thomas Jefferson Middle School. The potential for recreational uses at the center are a major benefit to the neighborhood. Yet, there are ongoing problems at TJ that limit its usefulness to the neighborhood. Athletic fields take up the vast majority of outdoor space. As discussed below in

"Neighborhood Green Space," there are no green gardens, lighting is a problem, and the playground is inadequate. Arlington Heights residents believe there is an opportunity to make improvements to the Thomas Jefferson Community Center grounds that would greatly enhance its usefulness to the neighborhood. Areas shown as blue, pink, aqua, and green in the following birdseye view of the TJ grounds are areas of open space that could potentially be improved.

Birdseye View of TJ Grounds (Credit: Arlington County GIS Mapping Center and Richard Bullington-McGuire)

Playgrounds

There are two playgrounds in Arlington Heights. Both are oriented to younger children. One is located at the Patrick Henry Elementary School. Since it is used by the elementary school during school hours, the hours for open use are limited. The other playground is on the Thomas Jefferson Community Center grounds, next to the Community Center (shown as orange).

The TJ playground gets extremely heavy use, not only by residents of Arlington Heights, which is seeing an increase in the number of families with small children, but also by many families from other parts of Arlington County, and the District of Columbia. The TJ playground is often used by parents with small children who also have older children or adults engaged in other recreation at TJ.

The existing TJ playground is inadequate for the needs of the neighborhood and the community at large. It is small, the equipment is at the end of its life cycle, and there is no sandbox or swings, which are basics in playgrounds throughout the county. Further, while use of the TJ playground is not restricted, there are times when young children are virtually unable to use the equipment. Due to lack of shade, it is too hot to play on the structures during peak sun hours in the summer. Also, the equipment is frequently used by the middle-school children, who have no play equipment of their own. Unless the tot lot is moved, there will be no long-term solution to either of these problems. The footprint of the lot is too small to accommodate large shade trees. The footprint cannot be expanded because it is hemmed in by the parking lot, the building, and basketball courts.

A solution needs to be found at TJ that meets the needs of both middle school-aged children and younger children. Given the heavy countywide use, improvement of TJ playground equipment should be considered a countywide priority.

Playground Recommendations:

1. Replace and upgrade the tot lot with a new playground for young children, relocated to another area of the Thomas Jefferson complex.
2. Create a new outdoor play area located near the Thomas Jefferson Middle School that is geared toward older children, perhaps with a climbing wall element.
3. Arlington County and Arlington Public Schools should work together to create two playgrounds, appropriately sited, to meet the needs of both preschoolers and middle school children.

Athletic Fields

There are four athletic fields at Thomas Jefferson Community Center (shown in yellow): two full-size rectangular fields, of which one allows permit play only, one smaller rectangular field, and one baseball field. None of these fields is in good condition, except the lower field, because of its low maintenance blue stone. This creates a situation where fields cannot be used for periods of time, and yet they take up the vast majority of the outdoor space at TJ. The pressure from athletic leagues for athletic fields is intense, so lack of efficient use is also an issue. In recent years, some teams have begun playing in an area not appropriate for team sports, at the northeastern corner of TJ, bordering Arlington Blvd. and S. Irving St., which has a large drain and a tree in the middle of it.

The blue stone field which gets the most intense use at TJ has been a problem for the neighborhood. During windy and dry conditions, this field kicks up large air masses of particulates that move across TJ and into neighborhood streets. This dust storm affect is shown in the photographs below, taken from TJ's east parking lot.

View of blue stone field from southeast parking lot at TJ (Photo Credit: Chris Buck)

The particulates cause eye irritation and coughing. This greatly impacts the quality of life of those attempting to use the outdoor facilities at TJ, as well as those in the neighborhood whose streets are affected. There are times when users are forced to leave TJ altogether as a result of the dust. Nearby neighbors have experienced problems with dust coating their cars, and dust making its way through cracks in their homes and into ventilated attics. This problem must be addressed. The county's attempt to address the issue in the fall of 2006 has not worked. Dust storms are still occurring on windy days, such as on February 23, 2007.

Athletic Field Recommendations:

All athletic fields at TJ should be upgraded in order to eliminate the impact of dust and grit storms on residents, as well as on those using the fields and other outdoor portions of the TJ complex, and to permit more efficient use of the fields.

Increased use of parks and other facilities should be coordinated with the Arlington Heights Civic Association.

Lighting

There are two significant lighting issues relating to the Thomas Jefferson Community Center. One issue relates to quality of life issues. The other issue is accessibility to the outdoor facilities at the Community Center. First, residents living on streets adjacent to the Thomas Jefferson Community Center have long complained about the significant light pollution from the high lights above the athletic fields. Second, lighting in many portions of the facility is inadequate, and presents a public safety hazard. This presents a serious concern, since the public safety concerns reduce the accessibility of the facility to the neighborhood. Further, the lack of adequate pedestrian-friendly lights in the complex may be related to the lighting design for the Community Center. These issues require the attention of the County.

Lighting Recommendations:

1. New pedestrian lighting for areas of the Thomas Jefferson complex is needed. Specific recommendations are included in the Streetlights section of this Plan.
2. Replace field lighting with dark skies lighting, or equivalent technology that reduces light pollution.

Neighborhood Green Space

Despite the amount of park and recreation programming in Arlington Heights, the neighborhood itself has long lacked a sizable and centrally located neighborhood park that could function as an outdoor meeting place for neighbors, or even a place to post neighborhood news. Further, there are no wooded recreation areas in the neighborhood, unless one counts the path around the Thomas Jefferson complex, which has a limited number of trees. The safe use of this path for walkers and runners is limited to daylight hours, however, due to the lack of lighting in portions along the path.

By a large majority, survey results showed that the two top priorities of Arlington Heights residents are to improve trails for walking, running, or bicycling, and to obtain public gardens.

New Park at S. Irving St. and 2nd St. S.

The county is in the process of restoring the green space at the northwest corner of the intersection of S. Irving St. and 2nd St. S., adjacent to the Thomas Jefferson site. This was a site purchased through the land acquisition program, and until recently had homes with schools programs in them. During the removal of the homes from this site, the Arlington County Department of Parks, Recreation and Cultural Resources contracted to "deconstruct" the homes, thus recycling many parts of the homes, which was a pilot program for the county.

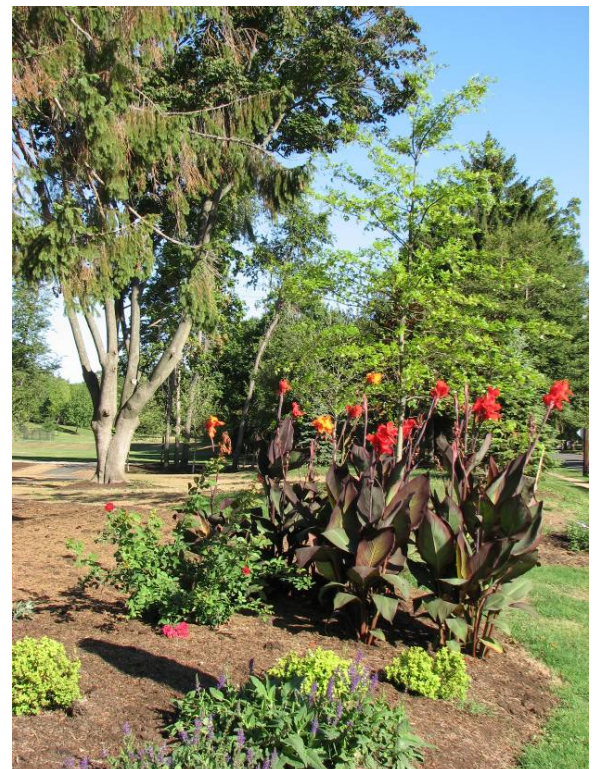

Photo Credit: Arlington County Department of Parks, Recreation, and Cultural Resources

Arlington Heights lacks a centrally located park that could serve as a neighborhood meeting place. The AHCA supports the use of the space at S. Irving St. and 2nd St. S. for neighborhood recreation. Therefore, the neighborhood opposes the inclusion of this property in any joint use agreement with Arlington Public Schools. Due to the lack of unprogrammed green space in the neighborhood, this park area should be preserved for the open use by the neighborhood and others visitors, and for this reason should not be subject to programming for courses or for summer camps, by either the county or Arlington Public Schools. Nor should the park be programmed space for the Arlington County Fair without the express agreement of the AHCA. County staff should work closely with the community on determining an appropriate use for this space.

Arlington Heights Park and “Fourth of July” Park

The neighborhood has two small parks, Arlington Heights Park and “Fourth of July” Park. Neither of these parks is large enough to support active recreational activities, and both require landscaping improvements to make them more attractive for passive recreation. Arlington Heights Park, located at the intersection of S. Irving and 9th St. S., has a drinking fountain and a couple of benches. [TODO: Photograph] Arlington Heights Park has a drainage problem that needs to be resolved. Standing water in the area is a breeding ground for mosquitoes, causes erosion, which makes the park unusable at times. “Fourth of July” Park, located on S. Garfield St. at Arlington Blvd. has only picnic tables. Safety concerns at “Fourth of July” Park, due to its location adjacent to a major highway make it inappropriate for any recreational use by children. [TODO: Photograph] While its location next to a bicycle trail makes it an ideal location for a rest stop by runners or cyclists, “Fourth of July” Park lacks a water fountain.

Green Buffers Along Arlington Blvd.

The portions of grass that front Arlington Blvd between S. Hudson and S. Irving streets should be considered a prime area for planting of additional trees and shrubs. This would buffer noise and air pollution, and would make the area more attractive.

Neighborhood Green Space Recommendations:

1. The new green space at S. Irving St. and 2nd St., S. should be devoted to neighborhood park use, and should not be programmed by the county or Arlington Public Schools. Nor should it be used for the Arlington County Fair without the express agreement of the AHCA.
2. The split rail fencing at “Fourth of July” Park should be upgraded with fencing to provide a safety barrier from the highway.
3. A drinking fountain should be installed at “Fourth of July” Park.
4. “Fourth of July” Park should be formally named, and a small sign added to give it proper park status.
5. Landscaping should be enhanced at “Fourth of July” and Arlington Heights parks.
6. The county should improve landscaping buffers on public property between Arlington Blvd. and the neighborhood, working with VDOT as necessary.
7. Plant additional trees and plants on public land.
8. Encourage planting of additional trees and plants on private land.
9. Increase the amount of open space in the neighborhood through the conversion of county owned property to parks, or through the purchase by the county of private property, working closely with residents on appropriate uses. Specifically, at this time a vacant lot owned by the Arlington United Methodist Church on the southeast corner of S. Glebe Rd. at 7th St. S. is now available for purchase. The neighborhood has asked the Arlington County Department of Parks, Recreation and Cultural Resources to place this property on its potential acquisition list.
10. The Civic Association and the Arlington County Department of Parks, Recreation and Cultural Affairs should work together on a continuing basis to identify and develop further areas within our community for neighborhood park use.

Parks Programming

Recreation

The programming at Thomas Jefferson Community Center is oriented toward providing the entire county with recreation opportunities. Because the facility is shared with Arlington Public Schools, and is heavily used by the middle school students, the number of hours for open use is limited. Residents recognize the needs of the middle school. However, one of the needs that TJ could meet for the neighborhood is an indoor play space for children during inclement weather. The number of Arlington Heights households with small children has increased, and yet there is a perception on the part of many families that TJ not only lacks family-oriented recreation programming, but that the culture of the recreation center is unwelcoming to children.

Arlington County Fair

Every year, Arlington Heights welcomes tens of thousands of fair visitors to the neighborhood. The Arlington County Fair is a wonderful event, which is heavily attended by Arlington Heights residents, especially those with children. The Arlington County Fair Board has made an effort to meet concerns of residents related to parking, litter, and crime during the fair. However, more coordination would benefit the neighborhood. The staging of the fair at the TJ site has a year-round impact on potential uses and improvements. Due to this impact, it is thought that TJ improvements should be linked financially to the fair.

Park Programming Recommendations:

1. Work with county staff to make the recreation center more welcoming to children. Consider programming oriented to small children, whose numbers are rising in the neighborhood.
2. Establish a standing committee of the AHCA to liaison with the Fair Board and the Arlington County Police Department on suggestions for fair programming as well as traffic, parking, and litter management.
3. Explore with county staff and the Fair Board the possibility of increasing ride tickets to the fair in order to set aside funds for improvement of TJ grounds.

Litter & Pets

Litter is a significant problem at the TJ complex and the streets surrounding it. Some dog owners do not clean up after their dogs. Some dog owners allow their pets to run off leash, endangering other users. The lack of code enforcement relating to litter and dogs running off leash impacts the quality of life of residents of the neighborhood.

Litter & Pets Recommendations:

1. The neighborhood should work with Thomas Jefferson Middle School and athletic leagues to encourage responsible trash disposal habits.
2. The county should install additional trash canisters on the TJ grounds near the blue stone field, to the east of the baseball field, to the east of the small rectangular field, and by the par fitness course.
3. The county should invest in trash canisters that can be closed so that trash does not get blown out of the top of the canisters or through the canisters.
4. The county should enforce existing code relating to littering and dogs running off leash.

Parking

Parking at Thomas Jefferson is often inadequate, resulting in cars parking in the neighborhood rather than in dedicated lots. Residents want to minimize parking on neighborhood streets to the extent possible.

Parking Recommendations:

1. The county should work to come up with long term parking solutions on this site.
2. The county should install signs in the parking lots on Second St. and at the entrance to the Community Center indicating the availability of additional parking off Old Glebe Rd. The signs should include a map of where all lots are located.
3. The county should encourage the use of public transportation and walking.
4. The neighborhood should assess streets regularly to determine whether on street parking should be restricted to resident permits.
5. The neighborhood and county police should continue to monitor streets, and require street closures and parking restrictions as necessary to ensure that residents continue to be able to park at their homes during the Arlington County Fair.

Renovation and Redevelopment of Joint-Use Facilities

Thomas Jefferson Middle School is slated for renovation by Arlington Public Schools (APS). This presents many opportunities for the students, teachers, and residents to improve the access, functionality, and appearance of the school. Because the school shares HVAC systems with the TJ Community Center, it is likely that some portion of the Community Center will require work. Arlington Heights residents would like to see APS work closely with the County to ensure that disruption of county programming is minimized, and to ensure that County needs at the facility are being considered as part of the renovation process.

The School Board is currently considering recommendations by the Superintendent of Schools to establish a high school program (“STEM”) at the Career Center site which would focus on science and technology. [TODO: Add appendix of Superintendent’s recommendation/or school board action] This recommendation was made in response to recommendations by the Multi-Site Study Committee (MSSC) that the site not be sold or leased to private entities. [TODO: Add appendix of MSSC recommendations]. MSSC also recommends keeping the Columbia Pike Library at the same site. No specifications or designs are available at this time for any of the proposed building upgrades or changes. One issue of concern is the need for coordination between APS and the County regarding the cost of upgrading or rebuilding the library, as well as the impact on the recently renovated Fenwick Center.

Due to its location on the Patrick Henry campus, the community is also concerned about the impact redevelopment might have on the safety and well being of students. The AHCA has held meetings and made [public comment](#), as have [individual residents](#), on scenarios currently under consideration, with a focus on the functional aspects of redevelopment. [TODO: Add appendix of public comment] Whatever decisions are made for the Career Center site, additional impact in

this area of the neighborhood will inevitably be felt as revitalization gets under way along Columbia Pike.

Renovation and Redevelopment of Joint-Use Facilities Recommendations:

1. Arlington Heights should be fully represented on any school committees that address the renovation of TJMS.
2. Arlington Heights residents should be given full opportunity to provide public comment throughout the entire renovation process of TJMS, whether it is programmatic decisions, building design, or construction-related concerns.
3. Due to the joint-use aspect of the site, APS should work closely with the County to ensure that disruption of county programming is minimized, and to ensure that County needs at the facility are being considered as part of the renovation process at TJ.
4. Arlington Heights should be fully represented on any schools committees that address proposed redevelopment of the Career Center.
5. Arlington Heights residents should be provided an ongoing opportunity to comment publicly on any proposed changes to the Career Center site.
6. The central kitchen at TJMS should be relocated off the middle school site to permit flexibility in the redesign and renovation of the middle school.

Traffic Management

Traffic management directly affects the quality of life and the character of the community. Heavy traffic and speeding on our local streets, with the resultant air and noise pollution and danger to pedestrians and neighborhood vehicles, are of major concern to our residents. Residents want curbs, gutters, sidewalks, and pedestrian lighting throughout the neighborhood to help ensure the safety of pedestrians, runners, bicyclists, and motorists. Residents would like to improve air quality and reduce street noise by reducing the number of car trips in the neighborhood. Residents also want improved maintenance of road surfaces and signage.

Survey results showed that:

1. A solid majority of residents surveyed opposed widening any streets in the neighborhood, but particularly Arlington Blvd., S. Fillmore St., and S. Glebe Rd.
2. The vast majority of residents surveyed desire sidewalks on at least one side of every street (80 percent), as well as curbs and gutters on both sides of every street (71 percent).
3. Eighty percent of residents surveyed thought there were areas of the neighborhood dangerous to school children and other pedestrians.
4. Eighty percent of residents surveyed were very concerned or extremely concerned about vehicles exceeding the speed limit in the neighborhood.
5. Sixty-nine percent of residents surveyed were very concerned or extremely concerned about cut-through traffic in the neighborhood.

Traffic Management Goals

1. Route traffic not having an origin or destination in Arlington Heights around the community via Arlington Blvd., S. Glebe Rd., Columbia Pike and Washington Boulevard.
2. Discourage the use of neighborhood streets as major thoroughfares.
3. Improve safety of the streetscape to encourage walking and bicycling to the recreational, educational, and commercial establishments in the neighborhood.
4. Promote the use of alternative transportation modes as substitutes for the private automobile through improvements to public transit for service to the neighborhood, encouraging the use of shared-ride vehicles, use of Zip cars, and improvements to the streetscape to encourage walking and bicycling.
5. Reduce the number of motor vehicle accidents at neighborhood intersections with Arlington Blvd. and Columbia Pike.

Traffic Safety Concerns in the Neighborhood

Residents would like to see a decrease in traffic through the neighborhood along 2nd St. S., 7th St. S., S. Highland St., S. Hudson St., and S. Irving St. These five streets carry significant traffic volumes through the neighborhood, often at excessive speeds. High traffic volumes combined with excessive speeds are of major concern not only to the residents on these streets, but also to the whole neighborhood. This traffic represents a constant danger to children playing and walking to school, as well as to other pedestrians. These high traffic areas are all within three blocks of one or both neighborhood public schools and play areas – Patrick Henry Elementary School and Thomas Jefferson Middle School and Community Center. In addition to safety hazards, the traffic contributes to noise and air pollution.

The portions of the neighborhood adjacent to Arlington Blvd. experience daily hazards from high-speed traffic. Every year, neighbors observe frequent high-speed accidents, particularly on Arlington Blvd. between S. Highland St. and S. Irving St. Although S. Fillmore St. has a left turn lane for westbound traffic turning south into the neighborhood, intersections between S. Highland and S. Irving streets are blind to westbound traffic stopped at the light at Fillmore St. Further, other than Fillmore, none of these intersections has a left turn lane for westbound traffic. At least one Arlington Heights resident has been killed in an accident at the intersection of S. Irving St. and Arlington Blvd. The 1997 Arlington County Pedestrian Plan showed that left turns were the leading cause of motor vehicle accidents involving pedestrians. This highlights the need for properly designed highway intersections, with left hand turn lanes with left turn arrows, in all areas where pedestrians are likely to cross. In Arlington Heights, these likely crossing areas are: Arlington Blvd. at S. Irving St. and Columbia Pike at S. Highland St., both of which lack left turn lanes and arrows; and Columbia Pike at S. Walter Reed Dr. (which lacks a left turn arrow for southbound traffic). For the safety of the community, it is extremely important that the county work with VDOT to improve safety conditions in these areas.

Arlington Blvd. has a posted speed limit of 45 mph, but traffic speeds typically range between 50 mph and 60 mph. These are the highest speeds in the neighborhood, and they tend to influence the speed of vehicles on feeder streets. Street openings for all streets with traffic flowing directly

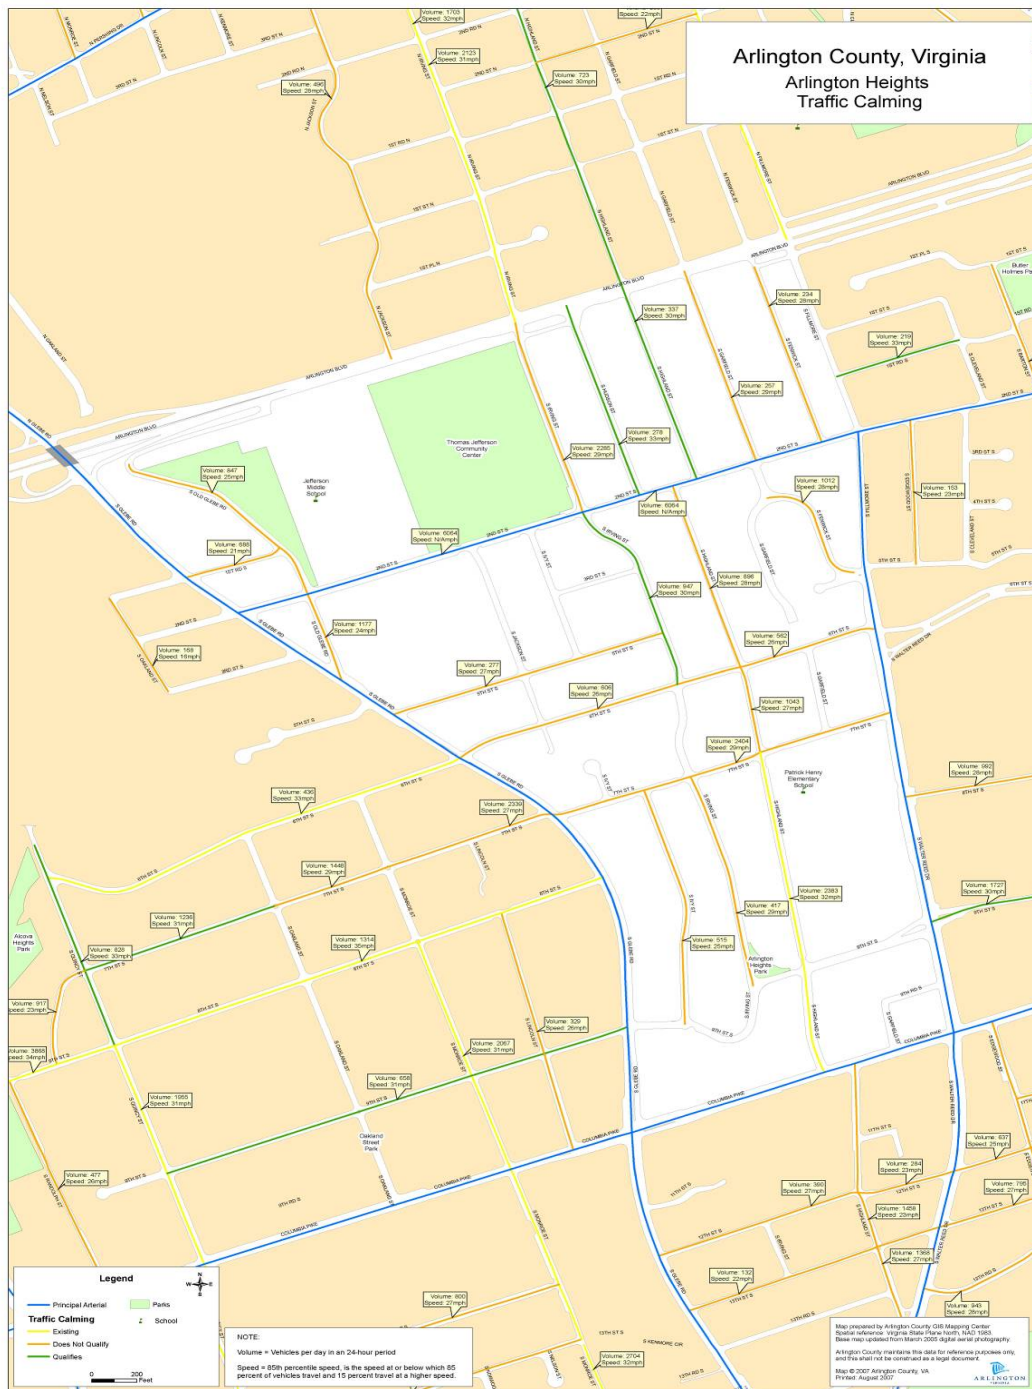

from Arlington Blvd should be assessed to discourage speeding and moving violations. S. Hudson St., in particular, has a very wide opening at the mouth of Arlington Blvd. This wide opening encourages drivers to speed, sometimes while turning left onto the street and trying to avoid oncoming traffic. As a result of speed, traffic turning left onto Hudson St. from Arlington Blvd often crosses onto the wrong side of the street. This creates a hazard for vehicles driving northbound on the street. It is also very unsafe for pedestrians and bicyclists in the area. The bicycle path crosses S. Hudson St. at the mouth of Arlington Blvd. Additionally, pedestrians frequently cross this area to reach the Thomas Jefferson grounds and preschools at Etz Hayim Congregation and Faith Lutheran Church.

The Glebe Rd. bridge across Arlington Blvd. needs to be replaced. This project should include improvements to pedestrian safety, including improved signage and crosswalks. Further, the location and amenities of the bus stop located on Arlington Blvd. at the bottom of the eastbound ramp between the ramp and the highway needs to be redesigned and possibly relocated to a safer location.

Columbia Pike also presents considerable traffic concerns for the neighborhood. According to data from the [1997 Arlington Pedestrian Transportation Plan](#), Columbia Pike had nearly two times the prevalence of pedestrian traffic accidents of any other road in the county. Some of the worst intersections noted border Arlington Heights. One area of congestion is the Westmont Shopping Center, at S. Glebe Rd. and Columbia Pike. The intersection of S. Highland St. with Columbia Pike still requires work. Arlington Heights residents also frequently walk in portions of the Pike outside the neighborhood, such as the Adams Square shopping center. In that area, the sidewalk curb cuts are not aligned properly with the crosswalks, requiring those with strollers or in wheelchairs to move outside the crosswalk to get across the street.

Traffic Calming

Neighborhood perceptions that there are problems with speeding in the neighborhood are borne out by the fact that a number of streets in Arlington Heights have qualified for traffic calming measures, as shown in the map below.

Arlington Heights Traffic Calming (Credit: Arlington County CPHD and GIS Mapping Center)

The recent completion of a neighborhood traffic-calming project on S. Highland St. next to Patrick Henry Elementary School has improved pedestrian safety in a critical area. As a general matter, most residents surveyed stated that they were either "opposed" or "strongly opposed" to traditional traffic calming measures such as barricades, speed humps, traffic circles, and one-way

streets. The one traffic calming measure strongly favored by residents surveyed was the use of raised crosswalks. Nevertheless, the need for traffic calming measures should be assessed on a case-by-case basis. As the map of streets qualifying for traffic calming shows, additional improvements need to be made, particularly on S. Hudson St., between Arlington Blvd. and 2nd St. S., which has an 85th percentile speed of 33 mph.

Traffic Management Recommendations:

1. Vigorously and consistently enforce the speed limit (25 MPH unless otherwise posted) on all streets, especially in the immediate vicinity of our schools and play areas.
2. Fund and carry out proposed neighborhood conservation projects.
3. Make all listed recommended street improvements to pavement markings and signage, which are set forth in Sidewalks, Curbs & Gutters section of this plan.
4. Install and properly maintain accessible sidewalks on every street in the neighborhood.
5. Upgrade and maintain crosswalks.
6. Narrow streets with medians or bicycle lanes, where practical.
7. Work with VDOT to place "No Left Turn" signs for westbound Arlington Blvd. traffic at S. Fenwick, S. Garfield, S. Highland, and S. Hudson streets.
8. Work with VDOT to add a left turn lane at the intersection of Arlington Blvd. and S. Irving St.
9. Construct a series of nubs along 2nd St. S. at Old S. Glebe Rd., S. Highland St. and S. Garfield St., incorporating pedestrian crosswalks.
10. Because of the large number of cars parked on Irving St., the AHCA endorses installing a "No Right Turn" sign on westbound 9th St. at S. Irving St. and a "No Left Turn" sign on southbound Irving St. at 9th St. S. to keep cut-through traffic to a minimum. The County would determine the hours of these restrictions.
11. Explore traffic calming options for S. Hudson St. between Arlington Blvd. and 2nd St. S.
12. Install nubs on the east side of S. Irving St. at 6th St. S. and 7th St. S. where there are sidewalks.
13. To improve the safety of difficult crossings at Arlington Blvd. and S. Fillmore St. and Arlington Blvd. and S. Irving St: (a) Build a second pedestrian and bicycle overpass across Arlington Blvd., near Fillmore St.; (b) Place a stop sign on the bicycle path at S. Hudson St. for westbound bicycle traffic; (c) Add crosswalks at Arlington Blvd. and S. Hudson St., Arlington Blvd. and S. Irving St.; (d) Improve drainage along bicycle path between S. Irving St. and the N. Jackson St. footbridge to prevent deterioration of the path.

Neighborhood Maintenance

There is plenty of beauty to be found in Arlington Heights. Many people take great pride in cultivating beautiful gardens and landscaping their gardens with imaginative designs. The neighborhood is filled with unique architecture and adorned with tasteful signs identifying its borders. Both private and public residents do their part to bring color and beauty to the neighborhood. There is always, however, room for improvement. Residents should be reminded, however, that it only takes a quick lawn mowing to keep the neighborhood looking neat.

Litter

Litter is a problem in Arlington Heights, especially on Arlington Blvd., S. Fillmore St./S. Walter Reed Dr., Columbia Pike, on the grounds at the TJ Center, on all streets surrounding the TJ Center, at the “Fourth of July” Park, and near bus stops. Disposable containers, empty drinks, wrappers and newspapers seem to plague the curbs along in these areas, despite the nearby placement of garbage cans. Residents should encourage everyone to properly dispose of litter. The County should take additional steps to clean up TJ grounds, and enforce code violations.

Refuse and Recycling

Residents strongly encourage private and commercial property owners to properly dispose of refuse and recycling materials, promptly remove refuse and recycling containers from the street, and promptly arrange for yard waste pick-up.

Graffiti

Graffiti has been an ongoing problem for the neighborhood, particularly at the Thomas Jefferson complex. Arlington County Police have been successful in preventing gangs from establishing themselves in Arlington Heights. Yet, some of the graffiti appears to be gang related. Recommended upgrades to the Thomas Jefferson complex should increase neighborhood usage, thereby reducing the incidence of graffiti in the neighborhood.

Tree Preservation

Arlington Heights has significant tree canopy. However, many of the trees in the neighborhood, particularly street trees, are aging. Further, most are not native trees, and many are undesirable species, such as Norway maple, whose surface roots interfere with healthy plant undergrowth. Many street trees are also under stress from pollution, soil compaction, and English Ivy. Since large trees and street canopy are a defining characteristic of the neighborhood, it is important to continually renew the tree population by planting new trees.

Tree Preservation Recommendations:

1. Work with the county's urban forester to devise a plan that encourages planting of trees on private property.
2. Plant more trees on public property.
3. Educate residents regarding tree preservation.

Invasive Plant Species

Portions of Arlington Heights are overgrown with invasive plant species, such as English Ivy, Vinca (periwinkle), Porcelain Berry, and Japanese Honeysuckle. These invasive plants can be found on both public and private property. Invasive plant species threaten native plants by

overcrowding, and they weaken trees, having a negative impact on biodiversity and on the tree canopy for the neighborhood.

Invasive Plant Species Recommendations:

1. Begin neighborhood educational campaign to encourage the elimination of invasive plants on private property.
2. Work with the Removal of Invasive Plants (RIP) volunteer organization, and the Arlington County Invasive Species Program to eliminate invasive plants on public property.

Pets

There are problems with animal care in the neighborhood. Some pet owners allow their pets to run free or do not clean up after them. Police and citizens should work together to devise a more effective means of dealing with the enforcement of pet ordinances.

Editing Authority

AHCA delegates its authority to the Neighborhood Conservation Committee to make additional edits to this document after it has been voted upon by the neighborhood, within the following scope: (1) correction of any errors, (2) editing for typographical errors or poor grammar, (3) improvement of information or data, and (4) editing content to reflect public comment. The AHCA also reserves the right to update this plan, as needed, consistent with the guidelines of the Neighborhood Conservation Program.

Appendix III: Arlington Heights Survey Results

The numbers indicate total number of responses. Comments are listed at the end.

IS THERE A CHRONIC PROBLEM WITH NOISE ON YOUR STREET?	
From traffic	50
From commercial establishments	2
From other residents	5
From aircraft	6
From public areas	7
From dogs	13
From ambulances	21
Other	11

DO YOU HAVE STRONG CONCERNS ABOUT THE WAY LAND IS BEING USED IN THE NEIGHBORHOOD IN REGARD TO:	
Apartment development	15
Single family detached housing	8
Commercial development	17
Townhouse development	21
Undeveloped land	4
Other	8

HOW WOULD YOU DESCRIBE YOUR LEVEL OF CONCERN ABOUT TOO MANY OCCUPANTS IN SOME HOUSES IN THE NEIGHBORHOOD?	
Not concerned	29
Somewhat concerned	39

Very concerned	19
----------------	----

ARE THERE ANY STRUCTURES, VACANT LOTS, OR ABANDONED OR INOPERABLE VEHICLES ON YOUR BLOCK OR ELSEWHERE IN THE NEIGHBORHOOD THAT YOU CONSIDER EYESORES OR SAFETY HAZARDS?	
Yes	37
No	49

ARE YOU AWARE OF ANY POSSIBLE ZONING VIOLATIONS IN THE NEIGHBORHOOD?	
Yes	18
No	64

IF PLANS WERE PROPOSED TO WIDEN THE FOLLOWING STREETS IN OR ADJOINING THE ARLINGTON HEIGHTS NEIGHBORHOOD, HOW WOULD YOU REGARD SUCH PLANS?					
	(Strongly favor-----Strongly oppose)				
	1	2	3	4	5
Glebe Road	8	11	16		43
Fillmore Street	5	9	14	14	42
Columbia Pike	7	10	25	9	32

SUMMARY OF WRITTEN COMMENTS

SOME OF THE ADVANTAGES OF LIVING IN THE NEIGHBORHOOD ARE:

- Proximity to the facilities at Thomas Jefferson
- The generally good quality of the neighborhood infrastructure
- Wide streets
- Trees
- Well maintained homes
- Quiet
- Residential character of the neighborhood
- Close to schools and houses of worship
- Quality of County services
- Location
- Can walk to restaurants and stores
- Bus service
- Quality of life
- Social activities
- Feeling of an isolated island community
- Excellent local businesses and restaurants
- Public transportation
- Diversity
- Stability
- The small park at 9th and Irving
- The Columbia Pike farmers market

SOME OF THE DISADVANTAGES OF LIVING IN THE NEIGHBORHOOD ARE:

- Noise
- Traffic
- Low SOL scores in the schools
- Number of rental properties
- No bike path
- Distance to the Metro
- Slow development and improvement on Columbia Pike
- The distinction between North and South Arlington
- Cut through traffic
- Speeding

- Ignored by the County government
- Traffic noise
- Congestion and rising density
- Lack of sidewalks and poor sidewalk maintenance
- Litter
- Rising real estate taxes
- Hard to cross Highway 50
- Too many subsidized houses
- Unlicensed, inappropriate businesses such as car repair run from homes
- Vagrants in our neighborhood
- Poor enforcement of parking laws
- Poor maintenance of Highway 50
- Noise from fire engines and trucks
- People use TJ grounds as a dog run
- Proximity to the Free Clinic
- Break-ins and car damage
- Street parking for large events at TJ
-

THE SURVEY ASKED NEIGHBORS TO IDENTIFY SPECIFIC IMPROVEMENTS THAT THEY THOUGHT WOULD BENEFIT OUR NEIGHBORHOOD. SOME OF THE RESPONSES WERE:

- Beautification of the Fillmore side of the Library
- Underground utilities
- Better maintain 1st Road S.
- Rock climbing wall at TJ
- Complete survey and systematic program of sidewalk, curb, and gutter replacements
- Beautification and better maintenance of Highway 50 streetscape
- Swimming pool
- Beautify the Career Center
- Fix up appearance of Strayer University and its parking lot
- Better litter clean up at TJ
- More on- site parking at TJ
- Improve drainage at 300 blocks of S. Garfield and Irving and on 600-900 blocks of S. Irving
- Improve lighting on the outdoor tract at TJ
- Develop "Main Street" concept on Columbia Pike
- Resurface and illuminate the paths off 5th and Garfield
- New playground equipment at TJ
- Block access to Highway 50 from minor streets
- Better snow removal
- Improve crosswalks along Glebe
- Install distance markers on the outdoor track at TJ
- Need a neighborhood playground
- Need zoned parking
- Clean up school and Metro bus stops
- Install sidewalks on S. Highland
- Improve traffic calming near the schools

- Better upkeep of rental homes
- Dog owners clean up after their pets
- Properly resurface roads after utility work
- Limit growth of multi-family housing in adjacent neighborhoods
- Remove abandoned vehicles
- Create safer way for pedestrians to walk across and alongside Highway 50
- Improve lighting on Highway 50 bike paths and pedestrian overpass
- Plant more trees on 3600 block of Arlington Blvd.
- Install 4-way stop signs to slow traffic
- Enforce dog leash laws

Appendix IV: Commercial Establishments (as of October 2006)

On or near S. Walter Reed Dr.:

1. 900 - AT&T
2. 922 - La Cabana Restaurant (703-553-0363)
3. 926 - same as above
4. 930 - Classique Image (703-920-2254)
5. 932 - [Columbia Pike Artist Studio] (703-486-9368)
6. 932 - U.S. Tae Kwon Do College (703-521-8100)

On or near S. Glebe Rd.:

1. 201 - 7-Eleven Food Store & Gas Station (703-271-0646)
2. 301 - Town Car Auto Repair (703-920-7887)
3. 325 - Dominion Arms Barbershop (703-486-9004)
4. 333 - Dominion Arms Apartments (703-979-4500)
5. 401 - vacant
6. 403 - Drake Hearing Aid Centers (703-512-1404)
7. 405 - Arlington County Republican HQ (703-685-2488)
8. 407 - Samaris Hair Salon (703-521-4525)
9. 409 - Dr. Robert E. Holland, Chiropractor (703-979-3677)
10. 411 - Dominion Dry Cleaners (703-892-0767)
11. 413 - State Farm Insurance, Joseph Taborga (703-920-5012)
12. 415 - Internet & Information Solutions, Inc. (703-920-2004)
13. 3411 5th St. S. - Video Warehouse (703-521-6512)

On Columbia Pike:

1. 2901 - Venus Stereo & TV (703-685-5311)
2. 2903 - Arlington Cinema 'n' Drafthouse (703-486-2345)
3. 2911 - My Family's Cafe
4. 2915 - Matuba Japanese Restaurant (703-521-2811)
5. 2919 - Bangkok 54 Restaurant (703-521-4070)
6. 2921 - vacant
7. 2927 - Bangkok 54 Market (703-521-4207)
8. 3003 - 7-Eleven Food Store (703-769-3760)
9. 3005 - Abi Azteca Grill (703-979-3579)
10. 3007 - El Puerto Seafood House (703-271-8100)
11. 3013 - McDonalds (703-920-0440)
12. 3045 - Subway Sandwiches & Salads (703-892-9191)
13. 3045 - [Formerly Strayer University, now vacant (703-892-5100)]
14. 3045A - Arlington Pediatric Center (703-271-8800)
15. 3045B - Mancini de Paris Hair, Nails, and Skin Care (703-920-4699)

16. 901 S. Highland St. – ECDC (703-685-0510)
17. 3101 - Mrs. Chen's Kitchen (703-920-3199)
18. 3111 - Lalibela II Ethiopian Restaurant (703-920-9500)
19. 3201 #2- Interamerica Express (703-486-0410, fax 703-486-0412)
20. 3201 #1- Itek Construction (703-521-6821)
21. 3203 – Honduras Super Market INC (703-920-2178)

Appendix V: Arlington Heights Housing Stock

According to the 2000 census there were 1,047 households in Arlington Heights. These fall into four broad categories:

Single-Family: There are about 489 single-family detached homes in the neighborhood. These houses consist of a variety of architectural styles, but most have brick veneer, are 2 stories high and have basements. Many have small amounts of composite siding on ells and additions. The vast majority of single-family homes in Arlington Heights were built between 1935 and 1970.

Duplexes: There are about 200 semi-detached 2-story brick duplexes in the neighborhood, built around 1945. Approximately 180 units are clustered in the Westmont section of Arlington Heights at the southern end of our neighborhood near Columbia Pike. Another 20 duplexes are located in the northwest corner of the neighborhood along 1st Rd. S.

Townhouses: There are 56 townhouse units in the neighborhood. The Dominion Square complex, built in 1981, has 48 units between 2nd St. S. and 5th St. S., just west of S. Jackson St. Another 8 townhouse units were built at the corner of S. Glebe Rd. and 5th St. S. in 1999, on the site of a former state Department of Motor Vehicles office.

Apartments/Condominiums: Two apartment/condominium complexes in the neighborhood have 302 housing units. The Arbors of Arlington condominium is a set of five 4-story brick veneer buildings with 114 garden-apartment style units. The Arbors is located in the extreme northwest corner of our neighborhood, near the intersection of S. Glebe Rd. and Arlington Blvd. Originally built in 1942 as Highland Hall Apartments, the buildings were renovated and converted to condominiums in 1982. Dominion Arms is a high-rise building along S. Glebe Rd., with 188 apartments. The Dominion Arms building was erected in the early 1960s.

Appendix VII: Excerpt from Arlington County Historical Document

SUMMARY DESCRIPTION

Located approximately four miles west of Washington, D.C., Arlington Heights is a residential neighborhood comprised of 177.125 acres in central Arlington County, Virginia. Arlington Heights is surrounded by residential and commercial development. The automobile thoroughfares of Arlington Boulevard to the north and Columbia Pike to the south physically bound the neighborhood. Other boundaries include South Fillmore Street, South Walter Reed Drive, and South Highland Street from South 7th Street to Columbia Pike on the east and South Glebe Road on the west. Arlington Heights formed from the integration of twenty-five subdivisions platted between 1909 and 1978, with initial improvements in the form of modest single-family residences. These buildings collectively display architectural elements that reflect the neighborhood's entire period of development. The domestic buildings, constructed of both wood frame and masonry, are primarily set back from the road with wide sidewalks buffering them from the paved public roadways. Many properties incorporate driveways and freestanding garages. The residential lots vary in size, with the standard lot measuring approximately fifty feet by one hundred feet. The streets run in a slightly irregular grid pattern between Arlington Boulevard, Columbia Pike, South Walter Reed Drive, South Fillmore Street, and South Glebe Road. Because the neighborhood developed over time through an amalgamation of multiple subdivisions, there are slight variations in the streetscapes and lot configurations. Mature shade trees line many of the streets. Arlington Heights, while primarily a single-family residential neighborhood with a number of twin dwellings, is also home to garden apartments, one high-rise apartment building, a commercial building along South Glebe Road, a synagogue, a parsonage, a middle school with community center, and two landscaped parks.

The initial development in the farming community that became Arlington Heights consisted of multiple parcels that were subdivided between 1909 and 1935, as documented by historic maps. Of the pre-existing dwellings and those constructed during this period, approximately fifty remain standing today. An additional fifteen dwellings in the neighborhood date to 1936 and are oriented to Arlington Boulevard. These modest dwellings, located primarily in the B. M. Smith, Dye and Gloth, Sarah Bailey, and Arlington Plateau subdivisions and along Arlington Boulevard in the Robert Dye subdivision, were not constructed as part of a planned residential community. The slow development on small land tracts, primarily less than ten acres in size, accelerated as World War II (1941–1945) ushered in an unprecedented need for housing surrounding the nation's capital. Several subdivisions were platted prior to and following World War II to meet these housing needs. Subdivisions platted in the late 1930s expanded the neighborhood to its current boundaries. After World War II, subdivisions were platted to fill empty tracts between existing subdivisions or re-subdivided existing lots. Re-subdivision occurred as late as 1963 and 1978. Thus, Arlington Heights is characterized by two phases of suburban development, one before and one after World War II, spurred by the influx of middle-class residents.

Today, Arlington Heights contains a variety of architectural styles, building types and forms,

which are primarily domestic buildings. Architectural styles include late-nineteenth-century Colonial Revival and early-twentieth-century Colonial Revival, Craftsman, Tudor Revival, and International. The early- to mid-twentieth-century buildings often exhibit vernacular, less detailed interpretations of the fashionable styles becoming popular throughout the nation, while the later more modest development reflects the solid middle-class nature of the commuter suburb. Typical forms include American Foursquares, Cape Cods, and ranch houses. Arlington Heights contains three dwellings that have been positively identified as prefabricated kit or mail-order houses. Building types include single dwellings, twin dwellings, garden apartments, a high-rise apartment building, religious buildings, an education building, and a commercial building. Although a number of the dwellings have replacement materials and/or small additions, the overall integrity of the neighborhood remains intact. The area making up the present-day Arlington Heights neighborhood consists of 610 properties, including single dwellings, multiple dwellings, a commercial building, a synagogue, a parsonage, a middle school/community center, and two parks that have remained a centerpiece of the neighborhood, visually as well as socially. Additionally there are 290 secondary resources, which include sheds, garages, gazebos, and basketball and tennis courts. There are 738 contributing resources and 162 non-contributing resources.

Appendix VIII: Arlington Heights Staff Comments

Land Use and Zoning			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
1	Page 23	Ensure that future residential development is of the same character, with consistent density standards.	By-right and Special Exception projects may generate higher densities than currently exist. The Zoning Ordinance provides specific regulations for how development can occur on any property, particularly for by-right projects. Any Special Exception proposal would have to be evaluated on a case-by-case basis for its appropriateness and compatibility with surrounding development. –Community Planning, Housing and Development (CPHD)
2	Page 23	All commercial development, large apartment complexes and schools should continue to be located on the periphery of the neighborhood, and the interior areas should continue to be zoned exclusively for single-family homes.	The General Land Use Plan is generally consistent with this statement. -CPHD
3	Page 23	Replacement of single-family housing in areas zoned R-6 should be replaced only with single-family housing, or be acquired by the county for parkland use. For example, “Fourth of July” Park at the corner of S. Garfield St. and Arlington Blvd. was converted from an empty lot to parkland.	<p>The property at the corner of S. Garfield St. and Arlington Blvd. was purchased by the county for another purpose and is now being used as park land. Any future park acquisitions should be consistent with the criteria of the Public Spaces Master Plan. –Department of Parks, Recreation and Cultural Resources (PRCR)</p> <p>Staff has reiterated that this area will remain a park. Staff does not support a drinking fountain in this area at this time. Staff also confirmed that any future park acquisitions will be consistent with the criteria of the Public Spaces Master Plan. Further questions regarding this comment should be directed to Lisa Grandle at 703-228-3332 or lgrand@arlingtonva.us.</p>

4	Page 23	Renovations and any 'infill' development should be consistent with the existing architecture and scale of nearby homes.	Similar to Recommendation #1, the Zoning Ordinance would regulate By-right development. For Special Exception projects, staff generally agree with this statement that new infill development should be compatible with adjacent uses/development. -CPHD
5	Page 23	No habitable housing should be lost from family-type housing stock for reasons of commercial development, upzoning or apartments, or to create or widen roadways.	Any proposal would have to be analyzed and evaluated on a case-by-case basis. -CPHD
6	Page 23	The GLUP map for Arlington Heights should be revised to reflect the existing use of all residences on 9th St. S., which is Low Residential (11-15 units/acre), rather than service commercial.	The GLUP designation lines are general; however staff would interpret the GLUP designation of "Service Commercial" in this area to apply to properties with Columbia Pike frontage and "Low" Residential to apply to residential properties along 9 th St. Staff can make a technical adjustment to the GLUP that would refine the line placement during the next reprinting cycle of the GLUP. -CPHD

Code Enforcement

Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
10	Page 23	County ordinances relating to maintenance of property should be strictly enforced. This is particularly important in cases of absentee landlords/owners for both residential and commercial properties.	Currently over sixty-seven percent (67%) of property maintenance investigation cases, within the purview of the Office of Community Code Enforcement and located within the Arlington Heights community, are identified through proactive surveys conducted by Staff. Code Enforcement has reinforced its standards of comprehensive and equitable enforcement throughout the County and strives to partner with Arlington Heights civic leaders, community boards and groups to educate about its standards, procedures and processes. -CPHD

Commercial Improvements on Columbia Pike

Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
14	Page 24	Emphasize the strengths of Columbia Pike: its vibrancy, live music, diversity, self-sufficiency, and pedestrian convenience.	<p>This is currently done through staff efforts and partnership with the Columbia Pike Revitalization Organization (CPRO). –Arlington Economic Development (AED).</p> <p>Recommendations 14-22, 24-25, and 27 are generally consistent with the Columbia Pike Initiative plans, including the Form Based Code which collectively seek to revitalize the Columbia Pike corridor. -CPHD</p>

15	Page 24	Establish a signature concept to support live arts and entertainment on Columbia Pike.	Staff is leading the Penrose Square master planning and design process consistent with the Columbia Pike Plan to create an outdoor plaza space that could be used for live arts and other forms of entertainment. The future plans for Columbia Pike include two other similar outdoor areas that would also be available for live arts. Live arts and entertainment such as 'Arts al Fresco' are coordinated by the county but funded by businesses. -PRCR
19	Page 24	Bury utility lines and improve road surfaces, curbs, gutters and sidewalks.	Current projects are between South Garfield Street and South Oakland Street; between S. Wakefield and Four Mile Run, and between S. Quinn and S. Orme Streets. -Department of Environmental Services (DES)
20	Page 24	Make commercial areas more pedestrian-friendly.	Making areas more pedestrian friendly along Columbia Pike is currently required for all Form Based Code compliant projects. -AED In the long term, the County intends to implement a street space plan that improves transit, bikes, pedestrian amenities and parking. -DES
24	Page 25	Support projects aimed at reducing traffic congestion	The proposed five-lane section west of S. Highland Street and better transit are intended to reduce congestion. -DES
25	Page 25	Expand transportation options, such as mass transit.	The proposed Master Transportation Plan has the Pike (with streetcar) and Glebe Road as Primary Transit Network corridors with frequency of 15 minutes or better for 18 hours per day, 7 days per week. -DES
30	Page 25	Shore up exposed wiring at former street-lighting base at northeast corner of Columbia Pike and S. Highland.	The exposed wiring base is on private property and will be removed during the construction of the forth-coming streetscape project. -DES

Parking			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
33	Page 25	AHCA recommends that the county construct a county-owned free or metered three-level parking ramp on the empty lot (RPC # 25014002) at the northwest corner of 9th Rd. and S. Garfield St. If practical, this lot should be co-planar and connected to the existing underused parking ramp at the southeast corner of 9th St. and S. Highland St. (RPC #25014006), creating one easy-to-use parking area for all Columbia Pike businesses. The parking should be designed so adjacent businesses can take direct advantage of their proximity to newly created parking areas.	The County has developed policies, including the Columbia Pike Parking Strategy and new zoning tools in the FBC, to achieve more shared parking that can be used by the public along the Columbia Pike corridor. In accordance with the Parking Strategy, the County strives to partner with private developers to augment the amount of parking that would be built solely through private financing. The County has identified the block between Garfield and Highland Streets as a location where a public/private partnership would be sought, should redevelopment occur. -CPHD
Streets and Sidewalks			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
39	Page 29	Install vertical reflective tape on sign posts, such as stop signs and yield signs.	The County installs red reflective tape only on stop sign posts and only at locations where there have been problems, such as running of the stop signs. If a problem is perceived at a particular stop sign in the neighborhood please contact Terry Bellamy at 703-228-3720. -DES
41	Page 30	Underground utilities whenever possible, especially in the revitalization district and along S. 2 nd Street.	While this is pursued in priority corridors such as the Pike, and should occur gradually over many years, because of the great expense, this is unlikely in many areas such as along 2 nd Street. -DES
Streetlights			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
44	Page 32	Install pedestrian friendly lights along the entire length of the running trail at the Thomas Jefferson Community Center.	<p>PRCR's standard policy is to light only those facilities that are open at night. Creating a trail that is open after dark and lit until the trail closes is an option that could be explored with the Master Plan for TJCC. -PRCR</p> <p>While the athletic fields and portions of the trail to and around the athletic fields are lighted, the entire trail is not and therefore those portions are not open at night. Creating an entire trail that is open after dark and lit until the trail closes is an option that could be explored with the Master Plan for TJCC.</p>

45	Page 32	Install pedestrian friendly lights at Thomas Jefferson Middle School in areas on Old S. Glebe Rd. and in dark areas to the north of the school building.	DES will work with Arlington Public Schools to identify locations near Thomas Jefferson MS in need of lighting improvements. Contact information for lighting is Ram Sarma at 703-228-3726 and contact information for Arlington Public Schools is Steve Larson at 703-228-7740. -DES
46	Page 32	Install pedestrian friendly lights along the bicycle path on Arlington Blvd.	DES should work with VDOT on lighting improvements for the bike path adjacent to Arlington Boulevard. Contact information for pedestrian lighting is Ram Sarma at 703-228-3726. -DES
Drainage			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
49	Page 32	Address drainage problems at Arlington Heights Park, which has become known by neighbors at S. Irving St. and 9th St. S. as "Lake Irving."	Due to the topography of area it would very difficult to correct. Any possible solutions would have major impacts on mature trees. -PRCR Dave Hundelt in Water, Sewer, and Streets (Department of Environmental Services) will go out and look at this area for possible drainage solutions. He would also like to visit the area after a heavy rain. He can be reached at 703-228-6539 or dhundelt@arlingtonva.us .
52	Page 33	Improve drainage on the Thomas Jefferson grounds, including the northeast field, south of the handball court (where a significant erosion problem exists), in the new park at South Irving and 2 nd Street, and in other areas where standing water or erosion are problems.	PRCR is in the process of improving the new portion of the TJCC complex where some settling has occurred on the old home sites. The fields are part of a storm water system that lies underneath of them and also drain to nearby catch basins. Drainage improvements to the fields will be looked at when staff develops of a Master Plan for TJCC. -PRCR
Pedestrian and Bicycle			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
53	Page 34	County staff should report to Arlington Heights regarding the condition of the footbridge and the timing of any maintenance or replacement.	The bridge has been inspected and is structurally sound. The bridge is presently on the schedule for maintenance. We have now moved this structure to the top of the repair list. The bridge maintenance will be completed this calendar year. Work is anticipated to begin this summer. The present condition of the bridge is acceptable for regular use. Regular (biannual) bridge inspections are conducted on this structure to verify its condition. These inspections are conducted by professional engineers and the reports are sent to Arlington County and VDOT. -DES

54	Page 34	<p>Improve the appearance of the footbridge by sanding and painting it, or alternately, replacing the footbridge.</p>	<p>The handrails, guardrails, and kick plates are the only items on the bridge that should be painted. The main complaint is that the bridge looks "rusted". The bridge is made out of a material called weathering steel.</p> <p>Bridge engineers choose weathering steel for its performance, economical and environmental benefits. Weathering steels contain elements that allow them to form a protective coating patina or coating when properly exposed to the atmosphere.</p> <p>The use of uncoated weathering steel typically provides initial cost savings of 10 percent or more, and life cycle cost savings of at least 30 percent over the life of the structure. Initial cost savings are realized because weathering steels do not need to be painted. Life cycle cost savings are realized by the material's durability. Inspections of bridges in service between 18 and 30 years show that weathering steel performs well in most environments.</p> <p>Weathering steels provide environmental benefits as well. They do not require initial painting, thereby reducing emissions of volatile organic compounds (VOC) when oil-based coatings are used. They do not require coating removal or disposal of contaminated blast debris over the life span of the structure, providing another significant environmental benefit.</p> <p>Due to the appearance question that has been brought up we are now going to blast and paint the entire structure to beautify the look of the bridge for the neighborhood. In addition to the painting that will be done, there are also plans to coat the walkways to improve the slip resistance especially during rain events. There are also plans to replace the fence that protects the roadway below and make some safety shapes as in removing trip hazards and replacing failing handrails.</p> <p>The bid opening for this bridge is on August 16, 2007. We will bring the contractor on board by Mid-September and begin work on this bridge by October 2007. By Christmas time, we want to make this bridge look beautiful and be very safe for the pedestrians. This rehabilitation includes the pretty lights, attractive new roof, shining durable paint for the entire bridge, and other presentable enhancements. -DES</p>
----	---------	---	---

55	Page 34	Install sidewalks at the North Jackson Street landing of the footbridge to improve pedestrian safety.	<p>Staff is planning on adding an asphalt landing to the bottom of the stairs that will wrap around to the sidewalk. A project has been approved through Walk Arlington to install sidewalks on North Jackson Street. It is now in design and will begin when the design work is completed.</p> <p>The funding has been approved for this project and it has been sent to engineering for design. A kick off meeting was held in early August for the project however, it will probably not go to construction for another 18 months. -DES</p>
56	Page 34	Build a second pedestrian and bicycle overpass across Arlington Blvd., near Fillmore St. (Recommendation also appears in Transportation Section)	The County does not support the construction of a new pedestrian bridge across Arlington Boulevard near Fillmore Street. -DES
Thomas Jefferson Community Center			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
60	Page 37	Replace and upgrade the tot lot with a new playground for young children, relocated to another area of the Thomas Jefferson complex.	Replacing and/or upgrading the playgrounds are options that can be explored when the playgrounds are due to be replaced or with the Master Plan for TJCC. Most playgrounds have a life span of approximately 15 years. For safety reasons playgrounds cannot be in isolated areas, however all options can be explored to create playgrounds that suit different age groups without conflict between the two user groups. -PRCR
63	Page 38	All athletic fields at TJ should be upgraded in order to eliminate the impact of dust and grit storms on residents, as well as on those using the fields and other outdoor portions of the TJ complex, and to permit more efficient use of the fields.	An alternative material for the athletic fields is an option that could be explored with the Master Plan for TJCC. In the mean time, staff will continue to use water and wetting agents to keep the dust down on athletic fields. -PRCR
66	Page 39	Replace field lighting with dark skies lighting, or equivalent technology that reduces light pollution.	Replacing lights with newer lighting fixtures that are designed to limit light pollution is an option that could be explored with the Master Plan for TJCC. Until that time, staff can adjust the current light fixtures to try to control some of the light pollution. -PRCR

Parks and Open Space			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
67	Page 41	The new green space at S. Irving St. and 2nd St., S. should be devoted to neighborhood park use, and should not be programmed by the county or Arlington Public Schools. Nor should it be used for the Arlington County Fair without the express agreement of the AHCA.	A design for this area will be explored with the Master Plan for TJCC. Staff will work with the neighborhood on the Master Plan. -PRCR
69	Page 41	A drinking fountain should be installed at "Fourth of July" Park.	The park is seen as a passive park. Water fountains are typically placed in high activity areas such as playing fields and community centers. In addition to this, installation and maintenance costs would be high for this location since a water line would have to be brought in. -PRCR
70	Page 41	"Fourth of July" Park should be formally named, and a small sign added to give it proper park status.	The Park and Recreation Commission has not made a recommendation to the County Board regarding the name 'Fourth of July' at this time. -PRCR
72	Page 41	The county should improve landscaping buffers on public property between Arlington Blvd. and the neighborhood, working with VDOT as necessary.	The beautification and overall enhancement of Arlington Boulevard has long been sought by a significant number of residents and neighbors that border this major arterial route. A comprehensive plan is now being developed. While DPRCR is always striving to find tree planting areas – and has done some planting within the right-of-way along Arlington Boulevard. Any future and major installations will need to be done under the directives set forth by the adopted comprehensive plan. -PRCR
74	Page 41	Encourage planting of additional trees and plants on private land.	A program for planting trees on private property through a neighborhood grant program is currently being reviewed. Trees are also distributed to civic associations as part of Neighborhood Day. -PRCR

78	Page 42	Establish a standing committee of the AHCA to liaison with the Fair Board and the Arlington County Police Department on suggestions for fair programming as well as traffic, parking, and litter management.	A member of the AHCA, Cathy Camp, was voted to serve on the Fair Board in Oct. 2006 as the liaison between the AHCA and the Fair. -PRCR
79	Page 42	Explore with county staff and the Fair Board the possibility of increasing ride tickets to the fair in order to set aside funds for improvement of TJ grounds.	In the past few years the fair board has invested several thousands of dollars to upgrade water and electricity at TJ. These investments may or may not be effected by the renovations scheduled to be made to TJ in the next few years. The Fair has also increased its sponsorship program to generate revenue to cover increasing Fair programming costs. The current price of Midway tickets are within market and are already subject to citizen complaints as being "expensive". The Fair Board is also committed to maintaining the Free admission for Fair patrons. There is an MOU in place between the Fair and County outlining the County services paid for by the Fair and traded out for the County's display and participation in the Fair. -PRCR
81	Page 42	The county should install additional trash canisters on the TJ grounds near the blue stone field, to the east of the baseball field, to the east of the small rectangular field, and by the par fitness course.	Staff will look at the site to determine where to locate additional cans. -PRCR
82	Page 42	The county should invest in trash canisters that can be closed so that trash does not get blown out of the top of the canisters or through the canisters.	Staff has been working on replacing old style cans with ones that look more appropriate with animal proof lids, which will also keep trash from blowing out. -PRCR
83	Page 42	The county should enforce existing code relating to littering and dogs running off leash.	This is an issue in all parks, and staff (Rangers) have been working hard to enforce this code. With the minimal Ranger staff this continues to be a difficult task. We will continue to work on these issues. -PRCR

Parking At Thomas Jefferson			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
87	Page 43	The neighborhood should assess streets regularly to determine whether on street parking should be restricted to resident permits.	The Residential Permit Parking Program is the appropriate program to address the problem of non-resident parking. Details about the program can be obtained by calling the program coordinator at 703-228-7944. –DES
Renovation of Thomas Jefferson Middle School and the Career Center			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
89	Page 38	Arlington Heights should be fully represented on any school committees that address the renovation of TJMS.	Arlington Heights is represented by two members on the Thomas Jefferson Middle School building level planning committee. –Arlington Public Schools (APS).
90	Page 44	Arlington Heights residents should be given full opportunity to provide public comment throughout the entire renovation process of TJMS, whether it is programmatic decisions, building design, or construction-related concerns.	Arlington Public Schools welcomes public comment from citizens in regards to design and construction of new and renovated schools at many points during the planning process. Public comments may be given via the appointed representatives on the building level planning committee (BLPC), or through direct attendance at BLPC meetings, or at worksessions and School Board agenda items relating to the projects. Comments may also be sent to APS Design and Construction via email to ajones@arlington.k12.va.us (Amy Jones). -APS
91	Page 44	Due to the joint-use aspect of the site, APS should work closely with the County to ensure that disruption of county programming is minimized, and to ensure that County needs at the facility are being considered as part of the renovation process at TJ.	Arlington Public Schools welcomes and encourages full County engagement and works closely with its County colleagues in the planning of any renovation or reconstruction of joint-use facilities. Three county staff members are serving on the building level planning committee and coordination is ongoing. -APS
92	Page 44	Arlington Heights should be fully represented on any schools committees that address proposed redevelopment of the Career Center.	Arlington Heights is represented by two members on the Career Center building level planning committee. -APS

93	Page 44	Arlington Heights residents should be provided an ongoing opportunity to comment publicly on any proposed changes to the Career Center site.	Arlington Public Schools welcomes public comment from citizens in regards to design and construction of new and renovated schools at many points during the planning process. Public comments may be given via the appointed representatives on the building level planning committee (BLPC), or through direct attendance at BLPC meetings, or at worksessions and School Board agenda items relating to the projects. Comments may also be sent to APS Design and Construction via email to ajones@arlington.k12.va.us (Amy Jones). -APS
94	Page 44	The central kitchen at TJMS should be relocated off the middle school site to permit flexibility in the redesign and renovation of the middle school.	Arlington Public Schools plans to phase out the central kitchen at TJMS in time for any renovation of the middle school. -APS

Traffic Management

Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
101	Page 48	Work with VDOT to place "No Left Turn" signs for westbound Arlington Blvd. traffic at S. Fenwick, S. Garfield, S. Highland, and S. Hudson streets.	<p>Like most major roads in Arlington, Arlington Boulevard was constructed in an era in which streets were intended for motor vehicles, with other modes and community compatibility given short shrift, if they were considered at all. Over the years, Arlington has invested much money to add sidewalks, bus stops and trails, but many of the roads remain auto-centric. In the past two decades, Arlington has begun to re-engineer a few roadway segments, but doing so on a widespread basis will require a much higher level of staffing and construction funding than have been available. Lee Highway in Cherrydale and sections of Columbia Pike are examples of what can be done with major efforts and multimillion-dollar investments over a period of years. The turn restrictions, and especially left-turn lane at Irving, service road and drainage improvements, that are recommended in this NC plan would require multi-neighborhood consideration, likely both south and north of Arlington Boulevard, and would be neither simple nor inexpensive to implement. Arlington Boulevard would benefit by a major planning and reconstruction effort but much remains to be done on Columbia Pike and there are many other deserving roadway segments about which Arlington residents have similar concerns about safety, especially for families with small children.</p> <p>Because of several VDOT bridge projects along Arlington Boulevard (at 10th/Courthouse, Glebe and (almost completed) Washington Boulevard)</p>

			and Arlington's project for a 9/11 Memorial Grove, Arlington has hired a consultant to help develop a vision from the Potomac to the Fairfax County line. Once that vision has been clarified, if Arlington Boulevard is determined to be a top priority so that staffing and funding can be attained, a major project could get underway here.
103	Page 48	Construct a series of nubs along 2nd St. S. at Old S. Glebe Rd., S. Highland St. and S. Garfield St., incorporating pedestrian crosswalks.	Nubs are currently in place on 2 nd Street at S. Highland, Irving and Garfield Streets. These cross streets may be too narrow for the installation of nubs. The Old South Glebe Road intersection would be an appropriate candidate for nubs to aid pedestrian crossing. -DES
104	Page 48	Because of the large number of cars parked on Irving St., the AHCA endorses installing a "No Right Turn" sign on westbound 9th St. at S. Irving St. and a "No Left Turn" sign on southbound Irving St. at 9 th St. S. to keep cut-through traffic to a minimum. The County would determine the hours of these restrictions.	Restricting traffic by turn restrictions would inconvenience residents and likely shift traffic to other neighborhood streets. -DES
105	Page 48	Explore traffic calming options for S. Hudson St. between Arlington Blvd. and 2nd St. S.	S. Hudson Street meets the criteria to participate in the NTC program. It has a problem severity ranking of 50, and currently there are about 15 streets ahead of it. Since the NTC program is not currently taking new projects because of funding constraints, funding for traffic calming could be pursued through the NC program. -DES

106	Page 48	Install nubs on the east side of S. Irving St. at 6 th St. S. and 7 th St. S. where there are sidewalks.	<p>S. Irving Street from 2nd Street South to 6th Street South qualifies for traffic calming, and a better alternative would be to study this segment of street for potential measures that would address both the speed of traffic and pedestrian safety, and to seek funding through the NC program. -DES</p> <p>Staff has collected traffic count data several times in the past few years on South Irving Street from 2nd Street to 7th Street South. The latest data were collected in March 2007 and indicated that the 85th percentile speed was 30 mph, which qualifies to participate in the NTC program. These data were collected after the NIP map was completed, so the most current information was not reflected on this map. We will make the change to the NIP map during the periodic updating process, which is yet to be resolved. Contact information for this issue is Jeff Sikes at 703-228-3696 or jsikes@arlingtonva.us.</p>
107	Page 48	To improve the safety of difficult crossings at Arlington Blvd. and S. Fillmore St. and Arlington Blvd. and S. Irving St: (a) Build a second pedestrian and bicycle overpass across Arlington Blvd., just east of Fillmore St.; (b) Place a stop sign on the bicycle path at S. Hudson St. for westbound bicycle traffic; (c) Add crosswalks at Arlington Blvd. and S. Hudson St., Arlington Blvd. and S. Irving St.; (d) Improve drainage along bicycle path between S. Irving St. and the N. Jackson St. footbridge to prevent deterioration of the path.	<p>(C) There are no crosswalks at South Irving Street and Arlington Boulevard because of the bike trail crossing and the service drive. There is a stop line to indicate where motorists are to stop. Since there is curb, gutter and a sidewalk along the service drive, there are crosswalks across S. Hudson and S. Highland Streets. -DES</p> <p>Pedestrian crosswalks have been painted on Old Glebe starting at 2nd Street and going towards T.J. On 2nd Street starting at Old Glebe, center lines and parking lanes were remarked. Stop bars were painted on South Irving and Highlands Streets as it approaches Arlington Boulevard. Contact information for this issue is Terry Bellamy at 703-228-3720 or tbella@arlingtonva.us.</p>
Tree Preservation and Invasive Plant Species			
Recommendation No.	Location In Plan	Civic Association Recommendation	Comment (Department)
108	Page 49	Work with the county's urban forester to devise a plan that encourages planting of trees on private property.	A program for planting trees on private property through a neighborhood grant program is currently being reviewed. Trees are also distributed to Civic Associations as part of Neighborhood Day. Staff is available to work with residents to further encourage planting on private property. -PRCR

109	Page 49	Plant more trees on public property.	The County plants +1200 trees a year on public property. Planting public trees will continue on acceptable sites. PRCR will work with residents to identify additional planting sites. -PRCR
-----	---------	--------------------------------------	--
